SUBJECT: Change Request for OMB Control Number 0503-0014 –
USDA eAuthentication Service Customer Registration

USDA eAuthentication is the system used by USDA agencies to enable customers to obtain accounts that will allow them to access USDA Web applications and services via the Internet. This includes access to web applications that provide services such as submitting forms electronically, completing surveys online, and checking the status of your USDA accounts. During the initial design of eAuthentication, USDA requested approval for the original USDA eAuthentication Service Customer Registration Form, used to register users for an account.

USDA is upgrading the eAuthentication infrastructure, which includes a major upgrade to the Commercial Off-The-Shelf software and changes to the system hardware. As this major modernization progresses, the USDA eAuthentication Service Customer Registration Form will be changing. However, the individuals completing this form will not have any significant change in the burden time or in the process used to complete the registration. In fact, individuals will note a decrease in the fields required due to removing several fields that are no longer necessary.

Attached to this memo are the following to help describe the requested changes:
