9. Description of lambing/kidding facilities:

10. How often is the lambing/kidding area cleaned and disinfected and describe process? If dates of cleaning and disinfection were recorded, attach copy of disinfection records.

11. Are separate contemporary lambing/kidding groups used?	YES (indicate in inventory which animals are in each group and attach supporting documentation)				
12. Method of disposal of placentas:					
13. Method of disposal of dead sheep/goats:					
flock. Additionally, complete as much information as possib • Official ID and any secondary identification or ma	n each laboratory confirmed case and/or clinically suspicious animal currently in the le on any clinical suspects that have resided in the flock over the last 5 years. rks				
 Sex Species and breed (or cross), or if breed is unknown Born on farm or purchased 	own, face color (sheep) or type (goats, i.e. meat, milk, or fiber)				
 Date of birth or estimated month and year of birth If purchased, purchase date, flock ID of seller, sel 	ler name and address, and a description of the documentation of the purchase.				
 Genotype, if known (attach documentation) Date clinical signs noted Confirmed case or clinical suspect 					
 If confirmed case, date laboratory confirmed; if su If female: lambing date(s), lambing location(s) and official or other ID, identifying marks or characteris Any additional comments on the animal's history 	d all available information on offspring (current location, sales records, birth date, sex, stics, sire, sire's genotype if known, etc),				
 Official ID, and any secondary identification or ma 	n the offspring of all female scrapie confirmed cases and the animal's disposition. rks				
 Sex Species and breed (or cross), or if breed is unknown of birth or estimated month and year of birth 	own, face color (sheep) or type (goats, i.e. meat, milk, or fiber)				
Genotype, if known (attach documentation)Official ID of dam and sire					
 Genotype of sire, if known (attach documentation) Disposition (i.e. living on farm, sold, dead or euthat Any additional comments on the animal's history.) anized), and if transferred name and address of new owner				
16. Use an attachment to document the following information on all purchased sheep/goats acquired at least 2 yrs before the first positive animal was diagnosed and up to 5 years before the positive animal was born or acquired unless a source flock has been identified. If a source flock has be identified (i.e., the infected animal was purchased and under 72 months of age), you can limit this information to the animals acquired from the source flock.					
 Official ID and any secondary identification or mail Sex 	iks				
 Species and breed (or cross), or if breed is unknown Date of birth or estimated month and year of birth 	own, face color (sheep) or type (goats, i.e. meat, milk, or fiber)				
 Genotype, if known (attach documentation) Date of purchase, flock ID of seller, seller name a Any additional information on the purchase history 	nd address, and a description of the documentation of the purchase				
VS Form 5-19D FEB 2011	Epidemiology Page 2				
17. Use an attachment to document the following information on all sheep/goats sold or otherwise disposed of since the positive animal(s) was born or					

acquired (Do not include lambs less than 12 months of age sold directly to slaughter).

- Official ID and any secondary identification or marks
 - Sex
- Species and breed (or cross), or if breed is unknown, face color (sheep) or type (goats, i.e. meat, milk, or fiber)
- Date of birth or estimated month and year of birth
- Genotype, if known (attach documentation)
- Date of sale, flock ID of buyer, buyer name and address, and a description of the documentation of the sale
- Any additional information on the sale history
- 18. Use an attachment to document the following information on the current flock inventory.
 - Official ID and any secondary identification or marks
 - Sex
 - Species and breed (or cross), or if breed is unknown, face color (sheep) or type (goats, i.e. meat, milk, or fiber)
 - Born on farm or purchased
 - Date of birth or estimated month and year of birth
 - If purchased, purchase date, flock ID of seller, seller name and address, and a description of the documentation of the purchase.
 - Genotype, if known (attach documentation)
 - For females, pregnancy status open, exposed to ram, late gestation and genotype of sire, if known
