

Attachment B1--Questionnaire Changes to Reduce Interview Length

These are the items that were deleted from the female questionnaire. We estimate the time savings at about 9 minutes, enough to reach our intended length of 80 minutes for women. The last column indicates whether we will make the same change for males, and the male question number. Questionnaire length for males is satisfactory at about 60 minutes. Rs = Respondents

Section	Item	Universe	Action for females	Same action for males?
A	AF-2 VACA (Are you currently on vacation from regular school?)	Currently being asked if GOSCHOL=yes (we will modify routing to ask only for Rs 15-19 interviewed in May-Sept)	Change universe	yes, AE-2
