SPECIFIC QUESTIONS

1. Describe the project and its purpose:

Pursuant to 44 CFR 352.5 FEMA is required to respond to any Nuclear Regulatory Commission (NRC) licensee that may request use of FEMA-owned/managed resources during a Radiological Emergency Preparedness (REP) exercise. The licensee must submit their request for resources in written statement to the host FEMA Regional Office. The request becomes part of FEMA's official record, and is stored in a file cabinet within FEMA HQ. The Regional Office will then forward the request to the FEMA Deputy Administrator for the National Preparedness Directorate for a decline or fail determination. FEMA's decision of a "decline or fail" response to the licensee is based on information that includes: (1) whether the licensee has made maximum use of its' own resources, and (2) the extent to which the licensee has complied with the 44 CFR 352 requirements. It should be noted that no licensee has ever requested the use of Agency resources since 1979. However, having this Collection approved and in place eliminates the need for urgency should a licensee ever submit a request of this nature.
