The ICE Health Service Corps, a division of ICE's Office of Enforcement and Removal Operations, has several information technology systems that are used to track information from medical records for aliens in ICE custody for various monitoring and reporting purposes. These are the Social Services Database, Hospitalization Database, Significant Detainee Illness Spreadsheet, Mental Health Coordination Database, Epidemiology Database, and Performance Improvement Database. This PIA describes the data maintained in these medical tracking systems, the purposes for which this information is collected and used, and the safeguards ICE has implemented to mitigate privacy and security risks to PII stored in these systems.

System: DHS/ICE/PIA-004(a) ICE Pattern Analysis and Information Collection (ICEPIC) Update.

Component: ICE.

Date of approval: October 26, 2011.

The PIA for ICEPIC was published in January 2008. This PIA Update was completed to provide transparency related to the Law Enforcement Information Sharing Service that enables law enforcement agencies outside DHS to query certain information available through ICEPIC. Additionally, through LEIS DHS law enforcement personnel are able to query external law enforcement agencies' sensitive but unclassified law enforcement information.

The PIA for EID was published in January 2010. In July 2010, a PIA Update for EID was published to address an expansion of the information entered into EID and the scope of external information sharing. This EID PIA Update addresses planned changes to the types of information shared and an added method of sharing.

The goal of PREDICT is to create a national research and development resource to bridge the gap between (a) the producers of

security-relevant network operations data and (b) technology developers and evaluators who can use this data to accelerate the design, production, and evaluation of next-generation cyber security solutions, including commercial products.
