

Justification Statement for Non-Material Change

Emissions Certification and Compliance Requirements for Nonroad Spark-ignition Engines (Transfer Burden from 2060-0603)

2060-0338

EPA is submitting a change worksheet for OMB Control Number 2060-0338 (EPA ICR Number 1695.11). This change worksheet is transferring burden currently approved under 2060-0603 to 2060-0338. When OMB approved the last ICR under 2060-0603, they suggested that the burden under 2060-0603 be transferred to 2060-0338 before the next renewal (because of the similarities between these two collections).

When OMB renews 2060-0338 (currently schedule to expire July 31, 2012), the renewal package will cover all of the requirements currently covered by both ICRs. When this change worksheet is approved, EPA will discontinue 2060-0603.
