TADPEM2. SHOW PARENT/GUARDIAN [IF CHILDAGE>=12 FILL: AND CHILD] TIME ACTIVITY DIARY FORM
This is called a time activity diary, and it will help CHATS researchers better understand if there is a relationship between the different places young people go and their health. I'll show you both how to complete this form by going over an example. We are asking that you complete one form each day until I return for Session 2. During Session 2, I will ask you for the completed forms. If you forget to complete the form one day, just pick up the next day and begin again.

This booklet contains the Time Activity Diaries I would like you to complete each day until I return for session 2. Please follow along as I review these instructions on the first page of the booklet.

PRESS 1 TO CONTINUE

TADPEM5. [IF CHILD IS 12 YRS OLD OR OLDER] You will see that there is a place to record if the diary is completed by [CHILD] or a parent. Who do you think will be completing the diary each day – you or [CHILD]?

- 1 PARENT
- 2 CHILD

TADPEM6. [IF CHILD IS 3-11 YRS OLD] You will see that there is a place to record if the diary is completed by the parent or the child. For a child [CHILD]'s age, we would like a parent to complete the diary with help from [CHILD].

PRESS 1 TO CONTINUE

PROGRAMMER: FOR THE REMAINING QUESTIONS IN THIS SECTION, IF TADPEM5=1 OR TADPEM6=1, USE FILLS FOR PARENT. IF TADPEM5=2, QUESTIONS ARE TO BE ADDRESSED TO THE CHILD DIRECTLY.

TADPEM7. The Time Activity Diary is divided into 4 parts or rows. Midnight-6am (early morning), 6am-Noon (morning), Noon-6pm (afternoon), and 6pm-Midnight (evening). The total number of hours on each of the 4 rows will equal 6 when the diary is completed.

Time can be recorded in whole hours or quarter hours. For example: $\frac{1}{4}$ hour is 15 minutes, $\frac{1}{2}$ hour is 30 minutes, and $\frac{3}{4}$ hour is 45 minutes. Do not record a location if it was less than 15 minutes

For each 6-hour time period during the 24-hour day, please write the number of hours (you/[CHILD] spent at each location.

PRESS 1 TO CONTINUE

TADPEM8. The Locations are divided into 2 groups.
INTERVIEWER: POINT TO INDOORS AND OUTDOORS SECTIONS.

Here, the instructions read...

Indoors. How long was the child any place indoors at home, school, or some other place? Write the other place at the bottom of the page, for example library, friend's house, or store. If the child went to another city, record the location and the city/state.

Outdoors. How long was the child any place outdoors at home (your yard), school yard, or some other place such as a park, a friend's or relative's yard, or the outside in the neighborhood? If the child went to another city, record the location and the city/state

PRESS 1 TO CONTINUE

TADPEM9. There is also a column in the middle where you will record the time (you/[CHILD]) spent traveling. Here, the instructions read...

How long was the child riding in any car, taxi, van, bus, motorcycle, or other automobile? Add all the time spent traveling in each 6-hour period together and record in the middle column. Do not count time riding a bicycle as traveling.

PRESS 1 TO CONTINUE

TADPEM10. I will mark the days of the week and date for each day you need to complete the time activity diary. Please begin recording your entries today.

INTERVIEWER: START WITH THE FIRST TAD PAGE AND MARK THE DAY "EXAMPLE." THEN MARK DAYS AND DATES FOR OTHER DAYS UNTIL SESSION 2.

PRESS 1 TO CONTINUE

TADPEM11. Let's review an example page together.

INTERVIEWER: EXPLAIN SPECIFICS OF EXAMPLE DAY.

ADDRESS ANY QUESTIONS.

PRESS 1 TO CONTINUE

TADPEM12. OK, that's all you need to know about the time activity diary. I'll call you in a couple days to see if you have any new questions.
Those are all of the questions I have for you today, [CHILD]. Thanks for helping out.

CHATS Time Activity Diary Instructions

Please complete a time activity diary for each day between session 1 and session 2 interviews, including the days of the interviews. Your CHATS interviewer will mark the days of the week for each day you need to complete.

All activity is for the child selected for the interview. There is a place to record if the diary is completed by the parent for the child or if the child completes the diary him- or herself.

For each 6-hour time period during the 24-hour day, please write the number of hours the child spent at each location.

The Time Activity Diary is divided into 4 parts (rows). Midnight-6am (early morning), 6am-Noon (morning), Noon-6pm (afternoon), and 6pm-Midnight (evening). The total number of hours on each of the 4 rows will equal 6 when the diary is completed.

Time can be recorded in whole hours or quarter hours. Examples: $\frac{1}{4}$ hour is 15 minutes. $\frac{1}{2}$ hour is 30 minutes. $\frac{3}{4}$ hour is 45 minutes. Do not record a location if it was less than 15 minutes.

Locations are divided into 2 groups:

- **INDOORS:** How long was the child any place indoors at home, school, or some other place? Write the other place at the bottom of the page, for example library, friend's house, or store. If the child went to another city, record the location and the city/state.
- **OUTDOORS:** How long was the child any place outdoors at home (your yard), school yard, or some other place such as a park, a friend's or relative's yard, or the outside in the neighborhood? Include time riding a bicycle or skateboard as time outdoors. If the child went to another city, record the location and the city/state

TRAVELING: How long was the child riding in any car, taxi, van, bus, motorcycle, or other automobile? Add all the time spent traveling in each 6-hour period together and record in the middle column. Do not count time riding a bicycle as traveling.

- 5 [IF COLUMN VC_OS IS NOT EMPTY “an outdoor air sampling device.”]

[THIS/EACH] device collects air samples and measures for different types of pollutants that may be in the air your child breathes. I will also collect dust samples from [CHILD]’s bedroom and [HIS/HER] main living activity area. This is so that we can measure allergens and other contaminants in the dust collected.

PRESS 1 TO CONTINUE

SDINTRO3a. [DISPLAY IF COLUMN PF_IS IS NOT EMPTY AND IF THE FIID MATCHES THE 5 FIS THAT WILL HAVE THE CO2 MONITOR] I would also like to measure how much the air moves in your home. We call this measuring your home’s air exchange rate and we do this in two different ways. In order to do this, we will need to place several small tubes throughout your home, then we will release a small amount of carbon dioxide gas, which is the same gas you exhale or breathe out, and then measure how fast it disappears. This test has been used in other studies and will cause no harm to those living in your home.

(FI Note if asked for more details: First, we will place several tubes throughout your home, which will release a harmless tracer into the air that is then captured in another, single tube. Second, we will release a very small amount of carbon dioxide gas in the room to a level, which is harmless, and then measure how fast the carbon dioxide escapes from inside to outside of your home. The amount of carbon dioxide that is released is the same as if a group of people were in your home breathing out normally with the doors and windows closed. Please note that carbon dioxide, which again is the harmless gas contained in my canister, should not be confused with carbon monoxide, which is a different type of gas and is poisonous. We will not be using the poisonous carbon monoxide gas for this test.)

DOES THE PARENT/GUARDIAN AGREE TO THE AER TESTING?

PP25. Thank you for agreeing to wear the PEM for the CHATS study. The PEM is designed to measure the major pollutants known to cause breathing problems or to worsen asthma-like symptoms. As I mentioned earlier, we will want [CHILD] to wear the PEM all day long, from morning until bedtime, until I return in 5 to 9 days. The PEM can only be worn on the shoulder strap have given you today and should not be removed from the strap. At night, [CHILD] should place the strap next to [HIS/HER] bed while sleeping.

PP26. Please do not take the PEM into the bathroom when taking a shower. Instead, just leave it outside the bathroom or in [CHILD's] room. When [CHILD] is taking part in vigorous physical activities, such as playing on a sports team or attending a physical education class, [HE/SHE] should leave the PEM in a locker or on a bench and mark the time and location where [CHILD] placed the PEM in the Time Activity Diary will talk about (later/next). Also, please do not place the PEM on the ground or floor as this could cause dirt and dust to contaminate

the device. I will leave you some information on general PEM dos and don'ts for you to follow in case you have questions."

IPINTRO1. [DISPLAY IF COLUMN VC_IS IS NOT EMPTY, IF EMPTY SKIP TO OPINTRO1] Now I would like to begin setting up the indoor air sampling device I mentioned earlier.

SHOW PARENT PICTURE OF INDOOR PLATFORM FROM THE JOB AIDS BOOKLET

Here is a picture of the device in use. Again, this device is used to measure the quality of the air [CHILD] breathes in your home. All we ask is that you leave the equipment in the

location in your home we agree upon today. There is nothing else that you would need to do.

PRESS 1 TO CONTINUE

IPINTRO2. When I return in 5 to 9 days for Session 2, I will collect the indoor air sampling device and ship it to the CHATS lab staff for analysis. As a reminder, you will receive a letter from the CHATS study in about 5 months giving you important information on the air quality in your home and any pollutants that may be in the air your child breathes. Again, if the air quality results suggest that improvements can be made in your home, the letter will provide suggestions for how to do that.

PRESS 1 TO CONTINUE

IPINTRO3. As a token of thanks for helping us with our study by answering today's survey questions and allowing us to set up these devices in your home, we will give you \$40 at the end of today's interview.

OUTDOOR PLATFORM DEPLOYMENT

OPINTRO1. [DISPLAY IF COLUMN VC_OS IS NOT EMPTY, IF EMPTY SKIP TO PREINCB1] Next I would like to set up the outdoor air sampling device I mentioned earlier.

SHOW PARENT PICTURE OF OUTDOOR PLATFORM FROM THE JOB AIDS BOOKLET

Here is a picture of the device in use. As you can tell, it looks very similar to the picture of the indoor air sampling device I showed you. This outdoor device is used to measure the quality of the air outside your home. It will also help us to determine how much outdoor air pollution is getting inside your home???. I would like to place the device in a location close to but outside of your home and ask that you leave it there until I return in 5 to 9 days for Session 2. There is nothing else that you would need to do with this device. During Session 2, I will retrieve the outdoor air sampling device and ship it to the CHATS lab staff for analysis.

PRESS 1 TO CONTINUE

OPINTRO1a. [DISPLAY IF VC_IS IS EMPTY OR IPINTRO4b=NO] As a reminder, you will receive a letter from the CHATS study in about 5 months giving you

important information on the air quality around your home and any pollutants that may be in the air your child breathes. Again, if the air quality results suggest that improvements can be made in or around your home, the letter will provide suggestions for how to do that.

As a token of thanks for helping us with our study by answering today's survey questions and allowing us to set up this device in your home, we will give you \$40 at the end of today's interview.

PRESS 1 TO CONTINUE

OPINTRO2. On the side of the cage is a number you can call if you have any questions. I will also leave you some information about the outdoor air sampling device that will include details on what is included in the cage.

May I set up the CHATS outdoor air sampling device in your home?

- 1 YES
