

Justification for OMB approval of no material or nonsubstantive change to currently approved information collection 1212-0041

PBGC is adjusting the hour burden for this information collection to correct a data-entry error in the previous submission.

The hour burden for this information collection, as stated in the supporting statement incorporated in the previous submission, is 666. By mistake, the number entered in the automated table in ROCIS was 333, which is the number of hours contracted out (the basis for the dollar burden). The public notice of the submission published in the Federal Register was consistent with the supporting statement, specifying an hour burden of 670.
