

**Information Collection Request
for
Emissions Certification and Compliance Requirements for Marine and Nonroad Spark-ignition Engines
2060-0338**

Justification for Change Worksheet

EPA is transferring burden from 2060-0321 (Emission Certification and Compliance Requirements for Marine Spark-ignition Engines) to this ICR, 2060-0338 (Emissions Certification and Compliance Requirements for Marine and Nonroad Spark-ignition Engines). Because of the similarity between these two ICRs, it is more logical to have all of these requirements covered by one ICR. Because 2060-0338 is in the process of being renewed, this change worksheet is being submitted now so all of the requirements can be addressed in the renewal package.

All of the burden currently covered under 2060-0321 is being transferred to 2060-0338 under this change worksheet. Once this change worksheet is approved by OMB, EPA will request that 2060-0321 be discontinued.
