

**NATIONAL SECURITY ASSESSMENT:
Defense Supply Chain Network**

SCOPE OF ASSESSMENT

The U.S. Department of Commerce, Bureau of Industry and Security (BIS), Office of Technology Evaluation, in coordination with the U.S. Department of Defense (DoD), Office of Manufacturing and Industrial Base Policy, is conducting an industrial base survey of DoD's supply chain. The principal goal of this effort is to produce a sector-by-sector, tier-by-tier (S2T2) evaluation of the defense industrial base with a specific focus on the aircraft, ground systems, missiles, missile defense, services and shipbuilding sectors for 30 defense systems. The results will provide DoD with a comprehensive picture of the defense supply chain as a benchmark to plan for potential budget, market, and technological challenges which could impact U.S. military capabilities and readiness.

RESPONSE TO THIS SURVEY IS REQUIRED BY LAW

A response to this survey is required by law (50 U.S.C. app. Sec. 2155). Failure to respond can result in a maximum fine of \$10,000, imprisonment of up to one year, or both. Information furnished herewith is deemed confidential and will not be published or disclosed except in accordance with Section 705 of the Defense Production Act of 1950, as amended (50 U.S.C App. Sec. 2155). Section 705 prohibits the publication or disclosure of this information unless the President determines that its withholding is contrary to the national defense. Information will not be shared with any non-government entity, other than in aggregate form. The information will be protected pursuant to the appropriate exemptions from disclosure under the Freedom of Information Act (FOIA), should it be the subject of a FOIA request.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

BURDEN ESTIMATE AND REQUEST FOR COMMENT

Public reporting burden for this collection of information is estimated to average 14 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information to BIS Information Collection Officer, Room 6883, Bureau of Industry and Security, U.S. Department of Commerce, Washington, D.C. 20230, and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control No. 0694-0119), Washington, D.C. 20503.

Section I GENERAL INSTRUCTIONS							
A.	Your company is required to complete this survey using an Excel template, which can be downloaded from the U.S. Department of Commerce, Bureau of Industry and Security (BIS) website. At your request, survey compliance staff will e-mail the Excel survey template directly to your company. For your convenience, a PDF version of the survey is available on the BIS website to aid internal data collection. DO NOT submit the PDF version of your company's response to BIS.						
B.	Respond to every question. Surveys that are not fully completed will be returned for completion. Use comment boxes to provide any information to supplement responses provided in the survey form. Make sure to record a complete answer in the cell provided, even if the cell does not appear to expand to fit all the information. DO NOT COPY AND PASTE RESPONSES WITHIN THIS SURVEY. Survey inputs should be made manually, by typing in responses or by use of a drop-down menu. The use of copy and paste can disrupt the data collection process. If your survey response is corrupted as a result of copy and paste responses, a new survey will be sent to you for immediate completion.						
C.	If information is not available from your facility/plant's records in the form requested, you may furnish estimates. For 2011 data, estimate full year data.						
D.	For specific questions or assistance with the Excel survey, e-mail: S2T2Survey@bis.doc.gov E-mail is the preferred method of contact and will allow for a detailed U.S. Government e-mail response for your company records. If you must phone, contact: <table style="width: 100%; border: none;"> <tr> <td style="width: 50%;">Jason Bolton, Survey Compliance Staff, (202) 482-5936</td> <td style="width: 50%;">Anna Bruse, Survey Compliance Staff, (202) 482-7418</td> </tr> <tr> <td>Teresa Telesco, Survey Compliance Staff, (202) 482-4959</td> <td>Michael Finucane, Survey Compliance Staff, (202) 482-3893</td> </tr> <tr> <td>Erika Maynard, Survey Compliance Staff, (202) 482-5572</td> <td>Chris Nelson, Survey Compliance Staff, (202) 482-1271</td> </tr> </table>	Jason Bolton, Survey Compliance Staff, (202) 482-5936	Anna Bruse, Survey Compliance Staff, (202) 482-7418	Teresa Telesco, Survey Compliance Staff, (202) 482-4959	Michael Finucane, Survey Compliance Staff, (202) 482-3893	Erika Maynard, Survey Compliance Staff, (202) 482-5572	Chris Nelson, Survey Compliance Staff, (202) 482-1271

Section II		DEFINITIONS
Term	Definition	
Authorizing Official	Executive officer of the company or business unit or other individual who has the authority to execute this survey on behalf of the firm.	
Backlog	Unfinished work or work for which you already have contract in your facility's order book.	
CAGE Code	Commercial and Government Entity (CAGE) Code identifies companies doing or wishing to do business with the U.S. Federal Government. The code is used to support mechanized government systems and provides for a standardized method of identifying a given facility at a specific location. Find CAGE codes at http://www.dlis.dla.mil/cage_welcome.asp .	
Core competencies	A specific factor that is central to the way a facility operates. Without this factor, the facility would struggle to hold its competitive position in the market.	
Critical Skills	Specific workforce attributes and training that enable a facility to produce its core product or offer its core service.	
Customer	An entity to which a facility directly delivers the product or service that the facility produces. A customer may be another company or another facility owned by the same parent company. The customer may be the end user for the item but often will be an intermediate link in the supply chain, adding additional value before transferring the item to yet another customer.	
Data Universal Numbering System (DUNS)	A nine-digit numbering system which uniquely identifies an individual business. Find DUNS numbers at http://fedgov.dnb.com/webform .	
Facility/Plant	A building or the minimum complex of buildings or parts of buildings in which a company operates to serve a particular function, producing revenue and incurring costs for the company. A facility may produce an item of tangible or intangible property or may perform a service. It may encompass a floor or group of floors within a building, a single building, or a group of buildings or structures. Often, a facility is a grouping of related locations at which company employees work, together constituting a profit-and-loss center for the company, and it may be identified by a unique DUNS number.	
Full Time Equivalent (FTE) Employees	Employees who work for 40 hours in a normal work week. Convert part-time employees into "full-time equivalents" by taking their work hours as a fraction of 40 hours.	
NAICS Code	North American Industry Classification System (NAICS) codes identify the category of product(s) or service(s) provided by your company. Find NAICS codes at http://www.census.gov/epcd/www/naics.html	
PSC Code	Product or Service Code used to report government procurement transactions. To find a PSC, visit https://www.fpds.gov/wiki/index.php/PSC,_NAICS_and_more .	
Rare Earth Element	Rare Earth Element is a category that includes numbers 57-71 of the periodic table (lanthanum, cerium, praseodymium, neodymium, promethium, samarium, europium, gadolinium, terbium, dysprosium, holmium, erbium, thulium, and ytterbium) as well as yttrium (39) and scandium (21).	
Service	An intangible product (contrasted to a good, which is a tangible product). Services typically cannot be stored or transported, are instantly perishable, and come into existence at the time they are bought and consumed.	
Single Source	A company or facility that is designated as the only accepted source for the supply of parts, components, materials, or services, even though other sources with equivalent technical know-how and production capability may exist.	
Sole Source	A company or facility that is the only source for the supply of parts, components, materials, or services. No alternative domestic or foreign suppliers exist other than the current supplier.	
Supplier	An entity from which your facility obtains inputs. A supplier may be another firm with which you have a contractual relationship, or it may be another facility owned by the same parent company. The inputs may be goods or services.	
United States	The "United States" or "U.S." includes the 50 states, Puerto Rico, the District of Columbia, the island of Guam, the Trust Territories, and the U.S. Virgin Islands.	
Utilization Rate	The fraction of a facility's potential output that is actually being used in current production, where potential output is based on a 7 day-a-week, 3x8-hour shift production schedule.

Section 9 VERTICAL INTEGRATION							
<p>The Department of Defense is concerned about potential constraints on competition due to vertical integration in the supply chain. In your facility/plant's business, are you concerned about potential biases in your customer-supplier relationships because your customers or your suppliers are also potential competitors in your own market niche? If "Yes", identify the product/service with which you are concerned, the name of the supplier/customer that is also a potential competitor, and the location of that potential competitor's facility/plant.</p>
