INFANT MEDICAL CARE LOG INTRODUCTION

ICL001. In order to help keep track of your {child's/children's} doctor visits or other health care provider visits, we are providing you with an Infant and Child Health Care Log {for each child}. At each Study visit or telephone interview, we will ask you about any health care visits your {child/children} had since the last Study visit or telephone interview. {This log/these logs} will help you remember that information.

The Infant and Child Health Care Log is very similar to the Pregnancy Health Care Log, and will be used the same way. The only difference is the addition of the Immunization/Vaccination/Shot Log which is where all of your {child's/children's} vaccination information will need to be written down.

It will be very helpful if you use the log to write down information whenever your {child receives /children receive} health care, so that you will be able to remember it accurately during NCS Study visits or telephone interviews.

INTERVIEWER INSTRUCTIONS:

- DISTRIBUTE INFANT AND CHILD HEALTH CARE LOG WHERE NUMBER OF INFANT AND CHILD HEALTH CARE LOGS = **MULTIPLE_NUM**.
- EXPLAIN INFANT AND CHILD HEALTH CARE LOG.

PROGRAMMER INSTRUCTIONS:

- IF **MULTIPLE_CHILD** = 1, THEN DISPLAY "children's", "for each child", "children", "these logs", AND "children receive" AS APPROPRIATE.
- IF **MULTIPLE_CHILD** =2, THEN DISPLAY "child's", "child", "this log", and "child receives" AS APPROPRIATE.
