

PRA Disclosure

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0938-1059. The time required to complete this information collection is estimated to average 79 hours per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: CMS, 7500 Security Boulevard, Attn: PRA Reports Clearance Officer, Mail Stop C4-26-05, Baltimore, Maryland 21244-1850.

Help

This is the log on screen for the PAT tool. It shows the current PRA Disclaimer and OMB approval number. It will be updated to reflect the new approval date, when received.

This screen has space for the user to type in his/her user name, password, performance year and SQL server information.

This screen from the "User Guide" shows "General Abstraction Guidelines" to assist users in completing the tool.

This screen shows all of the demographic information for the patient for whom the practice is reporting clinical data. There is one screen per patient. The information on this sheet is pre-populated using Medicare claims and enrollment information and includes the patient's name, gender, Medicare ID #, and date of birth. In addition, the panel on the right side of the screen shows which categories of measures the patient qualifies for (e.g. diabetes, congestive heart failure, coronary artery disease, and preventive services) and where the patient is in the reporting order. The screen shows whether the reporting for this patient is complete or incomplete and allows the practice to put in some comments specific to this patient such as why the patient was excluded, the source of data used for reporting, etc.

This is the screen for reporting the measures for coronary artery disease (CAD). Every patient eligible for reporting the CAD will have their own screen. Before completing the form, the practice will confirm that the patient has the diagnosis by selecting “Yes” or “No” in the box labeled “CAD Confirmed”. Then each of the measures has its own box whereby the user can type in information such as lab values, put in dates of tests by clicking on a calendar, and choosing “yes” or “no” from a drop down menu to confirm that a test was given. As with the demographic module screen, the right side of the screen shows what measures the patient qualifies for in reporting and the reporting status for that patient.

This is the screen for reporting the measures for hypertension (HTN). Every patient eligible for reporting the hypertension measures will have their own screen. Before completing the form, the practice will confirm that the patient has the diagnosis by selecting "Yes" or "No" in the box labeled "HTN Confirmed". Then each of the measures has its own box whereby the user can type in information such as weight, put in dates of visits by clicking on a calendar, and choosing "yes" or "no" from a drop down menu to confirm that a test was given. Then, for each of the office visit dates shown, the practice provides the required information about whether or not blood pressure was checked. As with the demographic module screen, the right side of the screen shows what measures the patient qualifies for in reporting and the reporting status for that patient.

This is the screen for reporting one of three meaningful use measures. Every patient eligible for reporting this measure will have their own screen. As with the demographic module screen, the right side of the screen shows what measures the patient qualifies for in reporting and the reporting status for that patient.
