Supporting Statement Form SSA-795, Statement of Claimant or Other Person 20 CFR 404.702, 20 CFR 416.570 OMB No. 0960-0045

A. Justification

- Section *205(a)* of the Social Security Act authorizes the Commissioner of the Social Security Administration (SSA) to regulate and provide rules for the nature and extent of proofs and evidence, and the methods of taking and furnishing such to establish an individual's eligibility to benefits. Individuals use Form SSA-795 to make signed statements relating to claims for Social Security benefits or Supplemental Security Income (SSI) payments under *20 CFR 404.702* and *416.570* of the Code of Federal Regulations. For example, *20 CFR 416.570* requires individuals' signed statements before recovery of any overpayment by adjustment of any overpayment under title II, VIII, or XVIII. Recipients of any of these programs may elect to have an overpayment withheld from their benefits, and use the SSA-795 for this purpose.
- 2. **Description of Collection** SSA uses Form SSA-795 in special situations where there is no authorized form or questionnaire. SSA also uses it to obtain information from claimants or other persons having knowledge of facts in connection with claims for Social Security benefits or SSI. The information we request on this form is of sufficient importance that a signed statement, including a penalty clause, is necessary. SSA uses this information to process, in addition to claims for benefits, issues about continuing eligibility, ongoing benefit amounts, use of funds by a representative payee, fraud investigation, and a myriad of other program-related matters. The most typical respondents are applicants for Social Security, SSI, or recipients of these programs. However, respondents could also include friends and relatives of the involved parties, coworkers, neighbors, or anyone else in a position to provide information pertinent to the issue(s).
- 3. Use of Information Technology to Collect the Information This agency-initiated form is simply a blank space followed by the penalty clause, allowing the person signing the form to provide any information desired. SSA also created a remarks screen in MSSICS to collect this information electronically via telephone or personal interview. As the electronic version is a blank MSSICS screen, and most respondents use the paper SSA-795, SSA does not currently track the percentage of users for the screen. In addition, since the collection of this information is agency-initiated, and because this form contains only a blank space and no formal questions, SSA has not made this form available electronically through an Internet application.
- **4. Why We Cannot Use Duplicate Information** The nature of the information we are collecting, and the manner in which we are collecting it preclude duplication.

- **5. Minimizing burden on Small Respondents** The information collection does not affect small businesses or other small entities.
- 6. Consequences of Not Collecting Information or Collecting it Less Frequently SSA uses no other form to collect data similar to what we collect on Form SSA-795. Using the SSA-795, SSA collects information on unresolved issues from claimants or other persons as needed to adjudicate claims or to resolve post-entitlement issues. If SSA did not collect this information, we could not properly adjudicate claims for benefits or resolve post-entitlement issues. Since SSA only collects the information on an as-needed basis, we could not collect it less frequently.
- **7. Special Circumstances** There are no special circumstances that would cause SSA to conduct this information collection in a manner inconsistent with 5 CFR 1320.5.
- **8. Solicitation of Public Comment and Other Consultations with the Public** SSA published the 60-day advance Federal Register Notice on May 11, 2012 at 77 FR 27829, and SSA received no public comments. We published the 30-day Federal Register Notice on August 9, 2012 at 77 FR 47688. If we receive any comments in response to the 30-day Notice, we will forward them to OMB. There have been no outside consultations with members of the public.
- **9. Payment or Gifts to Respondents** SSA provides no payment or gifts to the respondents.
- **Assurance of Confidentiality** SSA protects and hold confidential the information we collect in accordance with 42 U.S.C.,1306, 20 CFR 401 and 402, 5 U.S.C. 552 (Freedom of Information Act), 5 U.S.C. 552a (Privacy Act of 1974) and OMB Circular No. A-130.
- **11. Justification for Sensitive Questions** This information collection does not contain any questions of a sensitive nature.
- **Estimates of Public Reporting Burden** Approximately 305,500 respondents use Form SSA-795 annually. The estimated average completion time is 15 minutes per form for a total annual burden of 76,375 hours. The total burden reflects burden hours, and SSA did not calculate a separate cost burden.
- **13. Annual Cost to the Respondent -** There is no known cost burden to the respondents.
- **Annual Cost to the Federal Government** The annual cost to the Federal Government is approximately \$470,470. This estimate is a projection of the costs for printing and distributing the collection instrument, and for collecting the information.

- **Program Changes or Adjustments to the Information Collection Request** There are no changes in the public reporting burden.
- **Plans for Publication Information Collection Results** SSA will not publish the results of the information collection.
- OMB exempted SSA from publishing the expiration date for OMB approval on its forms. SSA produces millions of public-use forms, many of which have a life cycle longer than that of an OMB clearance. SSA does not periodically revise and reprint its public-use forms (e.g., on an annual basis). OMB granted this so that SSA would not have to stop using otherwise useable editions of forms with outdated expiration dates. In addition, we avoid Government waste because we do not have to destroy and reprint stocks of forms.
- **18. Exception to Certification Statement** SSA is not requesting an exception to the certification requirements at 5 CFR 1320.9 and related provisions at 5 CFR 1320.8(b)(3).

B. Collection of Information Employing Statistical Methods

SSA does not use statistical methods for this information collection.
