SURVEY INFORMATION

WHAT IS THE PURPOSE OF THE STUDY? This study aims to collect social and cultural information from those participating in any aspect of the Pacific Coast Groundfish Fishery. The study collected baseline data in 2010 to generate a description of the people in the industry before the 'individual fishing quota' program was implemented. After implementation we will repeat the study at various intervals. We can then compare the results from each study to update the baseline data on the industry, and better understand any changes or social impacts that have occurred in the industry.

WHO IS CONDUCTING THIS STUDY? This study is being conducted by the Human Dimensions Program at the Northwest Fisheries Science Center (NWFSC), National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA). This program researches people within ecosystems. This means we study human society as it relates to marine resources, inclusive of commercial fishing.

HOW IS THIS STUDY FUNDED? This project is funded by the NOAA Fisheries Office of Science and Technology, Economics and Social Sciences Program, to the Human Dimensions Program, Conservation Biology Division, NWFSC, NMFS, NOAA.

HOW WILL THIS STUDY BE USED? The information collected in this study will be used to understand the impacts of fishery management measures, and to inform fishery management in the future. The information will be publically available. It will also serve to meet regulatory requirements, including, for example, regulations concerning information about fishing communities in the Magnuson-Stevens Fishery Conservation Act National Standard 8 and those concerning minorities and environmental policy in Executive Order 12898 – the Environmental Justice Initiative.

HOW IS THIS SURVEY ORGANIZED? The survey is organized into seven parts; demographics, individual participation, connections, quota perspectives, quota share allocation recipients, a section for fishermen/harvesters, and a section for buyers/first receivers and processors. The questions allow us to better understand all of the components of the fishery and how they function and are connected.

WHO DOES THIS STUDY INCLUDE? This study includes former trawl limited entry permit holders, quota share holders, quota share allocation recipients, vessel owners, vessel captains/operators, crew, processors, buyers/first receivers, industry suppliers and service providers, fisherman's wives/partners and others who participate in aspects of the Pacific Coast Groundfish fishery.

HOW LONG WILL IT TAKE? This survey takes most people 45 minutes to complete.

ARE MY ANSWERS CONFIDENTIAL? This is a confidential survey. Analysis of the survey results will be anonymous and/or aggregated. Information in this survey will be subject to the confidentiality requirements of the National Marine Fisheries Service, and will not be provided or presented in any way as to identify individual respondents. Please see next page for more information.

DO I HAVE TO PARTICIPATE? Your participation and input is **VERY** important and will help us to better understand the unique opportunities and challenges of this fishery. However, this is a **voluntary** survey and you may choose to skip any question or end at any point in the survey.

HOW WAS MY NAME OBTAINED? Depending on your role in the industry, your name was obtained through ownership of a vessel, websites, through your employer, or through third party referrals.

Thank you for your participation!

SURVEY DEFINITIONS

The following definitions are for the application to this survey only. Where possible, these definitions have been derived from definitions found in associated fishery management documents¹.

AT-SEA PROCESSOR: An operation conducting processing that takes place on a vessel or other platform that floats and is capable of being moved from one location to another, whether shore-based or on the water.

BUYER/FIRST RECEIVER: A person(s) or organization(s) who receives, purchases, or takes custody, control, or possession of commercially caught fish onshore directly from a vessel.

CATCH SHARE PROGRAM: Not defined in MSA. A catch share program is a generic term used to describe fishery management programs that allocate a specific percentage of the total allowable fishery catch or a specific fishing area to individuals, cooperatives, communities, or other entities. It includes more specific programs defined in statute such as Limited Access Privileges (LAP) and Individual Fishing Quotas (IFQ). It also includes Territorial Use Rights Fisheries (TURFs) that grant an exclusive privilege to fish in a geographically designated fishing ground. The recipient of a catch share is directly accountable to stop fishing when its exclusive allocation is reached².

COMMERCIAL FISHING: (1) Fishing by a person who possesses a commercial fishing license or is required by law to possess such license issued by one of the states or the Federal Government as a prerequisite to taking, landing and/or sale; or (2) Fishing that results in or can be reasonably expected to result in sale, barter, trade or other disposition of fish for other than personal consumption.

FISHERMAN: An individual who plays a role on a vessel that commercially harvests, takes, or catches fish.

INDIVIDUAL FISHING QUOTA: A specific portion of a fishery's total harvest limit that can be harvested solely by an individual or business holding the individual fishing quota.

OWNER OF A VESSEL OR VESSEL OWNER: A person identified as the current owner in the Certificate of Documentation (CG-1270) issued by the United States Coast Guard (USCG) for a documented vessel, or in a registration certificate issued by a state or the USCG for an undocumented vessel.

PERMIT OWNER: A person who owns a limited entry permit.

PERMIT HOLDER: A vessel owner as identified on the USCG form 1270 or state motor vehicle licensing document.

PERMIT LESSEE: A person who has the right to possess and use a limited entry permit for a designated period of time, with reversion of those rights to the permit owner.

QUOTA POUNDS (QP): Means the quotas, expressed in round weight of fish, that are issued annually to each QS permit owner in the Shorebased IFQ Program based on the amount of QS they own and the amount of fish allocated to the Shorebased IFQ Program. QP have the same species/species group and area designations as the QS from which they are issued³.

QUOTA SHARES (QS): Means the amount of fishing quota for an individual species/species group and area expressed as a percentage of the annual allocation of fish to the Shorebased IFQ Program. The QS is used as the basis for the annual calculation and allocation of a QS permit owner's QP in the Shorebased IFQ Program³.

QUOTA SHARE PERMIT OWNER: An individual who has received or holds quota share as previously defined.

SHORESIDE PROCESSOR: An individual or operation/business that is permanently fixed to land that engages in processing; or receives live Groundfish directly from a fishing vessel for retail sale without further processing.
