

**SUPPORTING STATEMENT**  
**U.S. Department of Commerce**  
**National Telecommunications and Information Administration**  
**Computer and Internet Use Supplement to the Census Bureau's**  
**Current Population Survey**  
**OMB Control No. 0660-0021**

**B. COLLECTION OF INFORMATION EMPLOYING STATISTICAL METHODS**

**1. Universe and Respondent Selection**

The Census Bureau conduct the October supplement, in conjunction with the CPS, for which the universe is 114 million households. From this universe, we select a sample of approximately 72,000 households each month, of which approximately 59,000 households are eligible for interview. We actually interview about 55,000 households each month. We ask the items in the October supplement, as appropriate, for members of these households. We feel the most comparable response rate to similar questions asked of respondents would be the items asked in October 2011. Here are the historical response rates for the October supplement:

Supplement Year	Additional Items to Basic School Enrollment Supplement	Response Rate
1999	Language Proficiency Disability Items	93.63 %
2000	Basic School Enrollment Only	93.20 %
2001	Basic School Enrollment Only	93.34 %
2002	Library Supplement	93.35 %
2003	Computer Use Supplement	92.71 %
2004	Language Proficiency Disability Items	92.34 %
2005	Basic School Enrollment Only	92.61%
2006	Basic School Enrollment Only	91.92%
2007	Internet Use Items	91.97%
2008	Basic School Enrollment Only	91.71%
2009	Internet Use Items	92.10%
2010	Internet Use Items	91.53%
2011	Basic School Enrollment Only	91.29%

## **2. Procedures for Collecting Information**

The Computer and Internet Use Supplement is a supplemental survey associated with the CPS in October. Attachment A gives an overview of the CPS sample design and weighting methodology and response rates. The statistical properties of these supplemental items will fall within those associated with the CPS itself.

## **3. Methods to Maximize Response**

We maintain response rates and data accuracy for the CPS at high levels through interviewer instruction and training and close monitoring of data output. (Refer to Item 5 of Attachment A for a discussion of the CPS nonresponse.)

A full allocation for item nonresponse is done within the October Computer and Internet Use Supplement for eligible people. (Item nonresponse is not expected to exceed five percent.)

## **4. Testing of Procedures**

We do not require testing of procedures and methods since we have conducted the October supplement for more than 50 years. Attachment B discusses the reliability of estimates produced by the October 2010 Computer and Internet Use Supplement.

## **5. Contacts for Statistical Aspects and Data Collection**

The following individuals may be contacted on the statistical data collection and analysis operations:

### Statistical Design:

Yeng Cheng  
Demographic Statistical Methods Division  
U.S. Census Bureau  
(301) 763- 3287

### Data Collection/Survey Design:

Lisa A. Clement  
Demographic Surveys Division  
U.S. Census Bureau  
(301) 763-3806

### Statistical Analysis:

Kurt Bauman  
Population Division  
U.S. Census Bureau  
(301) 763-6171
