

OMB Control No. – 0693-0043 – NIST Generic Clearance for Usability Data Collections

**Project title: Study of Electronic Health Record Usability
PART 2 – Structured EHR Usability Interviews**

Recruitment Solicitation – Email text

You have been invited to participate in a research study involving electronic health record (EHR) technology. Participating in this study is completely voluntary.

Your participation involves completing a structured in-person interview about your experiences with and perceptions of EHRs. You can expect the interview to take approximately 75 minutes to complete.

We will be conducting structured usability interviews on these days:
[DATES OF STRUCTURED INTERVIEWS]
