

**OMB Control No. – 0693-0043 –
NIST Generic Clearance for Usability Data Collections
Project title: Study of Electronic Health Record Usability.
PART 4 – Usability testing of commercial EHR products
Recruitment Solicitation – Email text**

You have been invited to participate in a research study involving electronic health record (EHR) technology. Participating in this study is completely voluntary.

Your participation involves completing an in-person study in which you will be asked to perform tasks with EHR technology. You can expect the session to last approximately 90 minutes to complete.

We will be conducting observations on these days:
[DATES OF USABILITY TESTING]
