Subject: public comment on federal regiseter FW: milking tobacco 30 years after for all this agency can get - to sustain employees not needed on taxpayer rolls

deaths from smoking will diminish in years to come because fewer people smokenowadays than did 50years ago. those dying now are dying because they were faked by the us govt and tobacco profiteers who lied aboutit the dangers of smoking tobacco.so those death numbers will be reduced in years to come.

as to those in this agency hanging on to jobs to do useless, wasteful work and spending tax dollars like mad and accomplishing nothing for america - that is what is going on with this project. this project and spending needs to be shut down. we cant continue to fund I950 agencies for eternities afterward. this effort can be shut down. the project should be shut down. the budget for this should be zero. shut down these non essential spending programs like this one.
