F. As the information states, we are conducting a survey to learn about access issues vulnerable beneficiaries may face in home health care. CMS has contracted with L&M Policy Research, and their partner, Social & Scientific Systems, to gather this information to be used to inform CMS, Congress, and other policymakers as they consider changes to payments for home health services. The results will help CMS, Congress, and other policymakers to better understand the access problems that may exist,

especially for beneficiaries with low income or high severity levels of illness and those who live in medically underserved areas.

(FOR PHYSICIAN) Your participation is very important in representing physicians who refer some of the most vulnerable Medicare beneficiaries for home health services.

(FOR HHA) Your participation is very important in representing the full range of home health agencies.
