Information is needed on the expected prune and plum crop in Texas. Response to this survey is **voluntary** and not required by law, but your reply to the questions on this form will be very helpful. Individual reports will be kept **confidential**. Thank you for your cooperation.

Please make corrections to name, address and Zip Code, if necessary.

Definitions:

Bearing Acreage: Acres from which you will harvest prunes and plums this year. Include blocks you rent from others, and exclude blocks rented out. Deduct any waste area within blocks.

Expected Percent of Full Crop: A full crop is the yield you would expect to achieve under normal production conditions. This yield may or may not be the maximum production potential for your operation. Therefore, your expected percent of full crop may exceed 100%. Example: you project a mature block should produce 20,000 lbs./acre and you estimate this year it will produce 22,000 lbs./acre or 110% of a full crop.

Expected Production: The total pounds you anticipate harvesting. Consider the current condition of your orchards, and assume average weather and pest infestations until harvest.

1. Bearing acreage in 2009.	acres	001
2. 2008 production (bushel=60 lbs.).	pounds	002
3. Expected 2009 production (bushel=60 lbs.).	pounds	003
4. Expected percent of full crop (2009 production).	percent	004

Comment on fruit crop conditions, weather, insects, disease and orchard activities. Use other side if needed.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0535-0039. The time required to complete this information collection is estimated to average 5 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
