

NIST Summer Institute for Middle School Teachers: [insert school year] Pre-Survey

Thank you for selecting the link for the NIST Summer Institute Applicant Survey! Before continuing, please be sure to review the following information about the survey.

The Survey Is Confidential

This survey is being administered by Westat, the external evaluator for the NIST Summer Institute. As such, **your responses to the survey will be strictly confidential and will only be seen by Westat staff.** Your individual responses will not be made available to either NIST or any of your school personnel. All findings from this survey will be presented in the aggregate.

The Survey Is Voluntary

Participation in the survey is voluntary, but the information gained from your experience and opinions will be of great value to NIST as it refines its program to best meet the needs of middle school science teachers.

There Are No Right or Wrong Answers

There is no right or wrong answer to any of the survey questions; what is most important is that your answers accurately reflect your personal experience and opinions. **Your responses to the survey will in no way impact your eligibility for the program.**

If you have any questions about the survey, please contact Melissa Bryce from Westat at melissabryce@westat.com or (240) 3142588.

1. If you agree to participate in the survey, please check the following box and complete the survey.

fec I have read the information on this screen and understand what my participation involves. I consent to participating in the survey as part of the NIST evaluation.

OMB Control No. #06930033

Expiration Date: 10/31/2012

NOTE: This collection of information contains Paperwork Reduction Act (PRA) requirements approved by the Office of Management and Budget (OMB). Notwithstanding any other provisions of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA unless that collection of information displays a currently valid OMB control number. Public reporting burden for this collection is estimated to be 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed and completing and reviewing the collection of information. Send comments regarding this burden estimate or any aspect of this collection of information, including suggestions for reducing this burden, to the National Institute of Standards and Technology, Attn: Susan Heller-Zeisler, szeisler@nist.gov, 301-975-3111.

2. Please enter your ID number in the space below (your ID number can be found in the email with the link to this survey).

ID Number:

NIST Summer Institute for Middle School Teachers: Pre-Survey

3. For each of the subject areas listed below, indicate which subjects are covered in your classes in the current school year. (Mark one response on each line.)

Subject covered

Subject not covered

a. Biology

b. Earth Science

c. Space Science

d. Physics

e. Chemistry

f. Weather

g. Metrology*

***Metrology:** is the science of measurement, embracing both experimental and theoretical determinations at any level of uncertainty in any field of science and technology. Scientific or fundamental metrology concerns the establishment of quantity systems, unit systems, units of measurement, the development of new measurement methods, realization of measurement standards and the transfer of traceability from these standards to users in society. Applied or industrial metrology concerns the application of measurement science to manufacturing and other processes and their use in society, ensuring the suitability of measurement instruments, their calibration and quality control of measurements. Legal metrology concerns regulatory requirements of measurements and measuring instruments for the protection of health, public safety, the environment, enabling taxation, protection of consumers and fair trade.

NIST Summer Institute for Middle School Teachers: Pre-Survey

4. How prepared are you to link scientific concepts to realworld applications for each of the subject areas listed below. (Mark one response on each line.)

	Not prepared	Somewhat prepared	Moderately prepared	Very well prepared
a. Biology				
b. Earth Science				
c. Space Science				
d. Physics				
e. Chemistry				
f. Weather				
g. Metrology*				

***Metrology:** is the science of measurement, embracing both experimental and theoretical determinations at any level of uncertainty in any field of science and technology. Scientific or fundamental metrology concerns the establishment of quantity systems, unit systems, units of measurement, the development of new measurement methods, realization of measurement standards and the transfer of traceability from these standards to users in society. Applied or industrial metrology concerns the application of measurement science to manufacturing and other processes and their use in society, ensuring the suitability of measurement instruments, their calibration and quality control of measurements. Legal metrology concerns regulatory requirements of measurements and measuring instruments for the protection of health, public safety, the environment, enabling taxation, protection of consumers and fair trade.

5. What is your level of preparedness to use the following practices in your classroom?

(Mark one response on each line.)

	Not prepared	Somewhat prepared	Moderately prepared	Very well prepared
a. Use realworld examples to introduce science concepts				
b. Use realworld examples to motivate student interest in science				
c. Connect new science concepts to previous science concepts				
d. Create analogies for scientific concepts				
e. Address students' misconceptions				
f. Have students collect data				
g. Provide direct instruction to help students understand a scientific concept				
h. Ask students to compare the results of an experiment to their original predictions				
i. Ask students to explain their conclusions and/or reasoning				
j. Increase student interest in science careers				
k. Increase student interest in the role of science in everyday life				

NIST Summer Institute for Middle School Teachers: Pre-Survey

6. Approximately how often did you have students engage in the following learning activities during the current school year? (Mark one response on each line.)

	Weekly	Monthly	Annually	Never
a. Conduct investigations (e.g., doing lab activities or using manipulatives)				
b. Consider a realworld problem relevant to the course and develop a plan to address it				
c. Use technical passages (from news or science journals) to investigate current issues or new developments in science or technology				
d. Listen to guest speakers				
e. Go on field trips relevant to the curriculum				
f. Investigate possible career opportunities in mathematics, science, or technology				
g. Design and implement their own scientific investigation				
h. Use "stateoftheart" equipment or technologies				

NIST Summer Institute for Middle School Teachers: Pre-Survey

7. Consider only science teachers within your school: How often did you do the following with them during the current school year? (Mark one response on each line.)

12 times a week 12 times a month 12 times a year Never

a. Discuss general ideas for how to teach specific science concepts

b. Share a specific science lesson that was very effective for teaching a concept

c. Share strategies for making science accessible to all students

d. Have my classroom observed by other science teachers to demonstrate how to teach a specific science lesson, activity, or concept

e. Demonstrate a specific science lesson, activity, or concept for students in another teacher's classroom

8. Consider only science teachers outside your school: How often did you do the following with them during the current school year? (Mark one response on each line.)

12 times a week 12 times a month 12 times a year Never

a. Discuss general ideas for how to teach specific science concepts

b. Share a specific science lesson that was very effective for teaching a concept

c. Share strategies for making science accessible for all students

9. When you had a science content question related to your teaching responsibilities during the current school year, how often did you use the following information sources to obtain answers? (Mark one response on each line.)

12 times a week 12 times a month 12 times a year Never

a. A teaching colleague within my middle school

b. A teaching colleague at another middle school

c. A science supervisor from within my school district

d. Someone from a professional science teaching organization (e.g., NSTA)

e. A professional scientist of my acquaintance (e.g., a former professor)

f. My school district's science website

g. My state's science website

h. A targeted Google search

i. A federal agency website (e.g., NSF, NASA, NOAA, NIST)

j. Specific science websites (e.g., Why Files, Exploratorium)

k. Other

10. If you selected "Other" in Question 9, please specify the "Other" information source(s)

in the space below:

5

6

NIST Summer Institute for Middle School Teachers: Pre-Survey

11. Indicate the extent to which you agree or disagree with each of the following statements for the current school year. (Mark one response on each line.)

	Strongly Disagree	Disagree	Agree	Strongly Agree
a. The quality of my teaching influences my students' interest in science				
b. The quality of my teaching influences my students' achievement in science				
c. I continually find better ways to teach science				
d. I know how to motivate my students to learn science				
e. I influence the quality of science instruction for students outside of my own classroom				
f. I am currently in a position to influence the number of my students that know about sciencerelated careers.				
g. I am currently in a position to influence the number of my students that find STEM subjects interesting.				
h. I am currently in a position to influence the number of my students that view science as being relevant to their lives.				

NIST Summer Institute for Middle School Teachers: Pre-Survey

If you are not finished with the survey, select the "Previous" button to navigate the survey and complete your responses.

If you are ready to submit your survey now, select the "Done" button. After you submit, you will NOT be able to reenter the survey.
