REMOVE COMPLETED CASES: This function will remove all cases that have been screened, and for which final interview codes have been entered for all selected respondents.

*This function allows the FI to refresh his/her case list by removing all cases on iPAQ that have been completed, have complete Access Data entered, and all final data successfully transmitted to RTI. FI obtains FS approval before using this function.*

REMOVE ALL CASES: **USE WITH EXTREME CAUTION!!!** This function will remove ALL cases, and their associated data from your handheld device. This function should only be used as directed by your field supervisor and RTI.

*This function prepares the iPAQ to receive the next quarter's cases by removing all current final/transmitted cases from the iPAQ, then allowing the iPAQ to pick up the next quarter's cases upon a subsequent transmission. This function was moved to the CMS, but this feature to initiate the process was left on the iPAQ as a troubleshooting option.*
