Developer Notes			
NOTE that the emergency messages associated with the 'activeFlag' variables are NOT mutually exclusive. Any or all of the messages might be played, in any combination, based on the values of the variables. That said, care should be taken to use these messages judiciously in order to avoid front-loading the call with off-topic messaging, and to use these emergency messages only for legitimate emergencies (as opposed to less critical informational messaging).

Changes in the law will make it easier for some people to qualify for extra help. Social Security won't count the help you receive with your household expenses as income, or any life insurance policies, as a resource when determining your eligibility. You may also be able to get help with Medicare costs from your state under a Medicare Savings Program. Applications for extra help can initiate the application process for the Medicare Savings Programs in your state. We'll send your information to your state and they'll contact you to help you apply for the Medicare Savings Programs, unless you tell us not to.

initial	Always	mm2200_ini_01	There are three ways someone can become a representative payee: a payee may be appointed by the Social Security Administration; a payee may be requested by a beneficiary - whether they currently have one or not - or someone who already has a payee may become their own payee. When we find that a beneficiary needs help managing their Social Security or SSI benefits, we appoint a Representative Payee for them. Appointed payees must be interviewed in person, and complete a form at a Social Security office. There, the appointed payee will need their social security number, proof of identification (like a driver's license), as well as the name and contact information of the beneficiary's doctor. If, on the other hand, a beneficiary wants to obtain a payee, or wants to change their current payee, the potential payee must be interviewed in person, and complete a form at a Social Security office. Again, the potential payee will need their social security number, proof of identification, as well as the name and contact information of the beneficiary's doctor. In addition, although a potential payee may have 'power of attorney,' Social Security does not recognize 'power of attorney' for purposes of managing benefit payments. Finally, if you want to become your OWN payee, you need to show evidence (a doctor's statement, for example) that you're now able to handle your money yourself.

2.2 AddressOSDM Dialog

This module collects an address from a caller. This module is likely to be incorporated into a larger application. NOTE TO CUSTOMER: This is a packaged application, and both the flow and code can not be altered as it is sold and delivered as a packaged piece of code. We will have some flexibility in terms of prompt wording (within boundaries, as we don't want to change grammars) and there are some configurable parameters that we can change from their defaults. Please keep this in mind as you review the document.

Developer Notes

Code must calculate the three specific months based on current date and SSA business practices. The prompt MonthChoices is then the concatenation of the first and second month in medial inflection, and the third month in final inflection. "One Step Correction" strategy should be available to the Caller (e.g., "No, February") -- This means both the collection grammar and the confirmation grammar are active during the confirmation phase. (This can be done as a parallel grammar.) The grammar that should be accepted includes "as soon as possible" (ASAP) and its synonyms, the three specific months calculated above, and any additional months between the current month and the first of the calculated months. For example, if a call is received toward the end of September, the valid months are October, November and December, but the grammar should include September, October, November, December, and the ASAP synonyms, and September and October should be mapped the same as ASAP. The current month is not prompted, but it should be recognized and handled the same as ASAP.

Developer Notes			
Prompt ka0220_out_06 should never actually be reached in this state because if they've already gone through kba once then the SSN should have already been collected and a caller with task = screen pop would not reach this state. Same with prompt ka0220_out_06 and second time through main menu because all other elements already collect SSN and DOB.
