

Purpose for Not Combining with 1140-0070

The terms of clearance on the previous approval of this collection stated that ATF plans to combine this collection with 1140-0070. This collection (1140-0074) was not combined with 1140-0070 because upon further review it was determined to be more practical to keep this collection separate. ATF is currently evaluating if an upcoming requirement should be combined with this collection. If the upcoming requirement is combined with this collection it will add more respondents and burden hours. Until the evaluation is complete and a determination is made about how to proceed, ATF feels we should keep this collection separate.
