SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

In the event a worker is injured while operating a mechanical power press, 29 CFR 1910.217(g) requires an employer to provide information to OSHA regarding the accident within 30 days of the accident. This information includes the employer's and worker's name(s), workplace address and location; injury sustained; task being performed when the injury occurred; number of operators required for the operation and the number of operators provided with controls and safeguards; cause of the accident; type of clutch, safeguard(s), and feeding method(s) used; and means used to actuate the press stroke. OSHA's Directorate of Standards and Guidance, or the State agency administering a plan approved by the Assistant Secretary of Labor for Occupational Safety and Health, collects the information. These reports are a source of up-to-date information on power press machines. Particularly, this information identifies the equipment used and conditions associated with these injuries.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirement contained in the Standard on Reports of Injuries to Employees Operating Mechanical Power Presses (29 CFR 1910.217(g)). OSHA is proposing to decrease the existing burden hour estimate for the collection of information requirement specified by the Provision from 13 hours to 9 hours, for a total decrease of 4 hours. This adjustment is a result of a decline in the number of reports received by OSHA annually.

The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Type of Review: Extension of a currently approved collection.

Title: Reports of Injuries to Employees Operating Mechanical Power Presses (29 CFR 1910.217(g)).

OMB Number: 1218-0070.

Affected Public: Business or other for-profits; Federal Government; State, Local, or Tribal Government.

Number of Respondents: 83.

Frequency of Response: On occasion.

Average Time Per Response: Five minutes (.08 hour) for a secretary to submit the report to OSHA and 15 minutes (.25 hour) for a supervisor to obtain the information regarding the accident and to prepare the written report.

Estimated Total Burden Hours: 9.

Estimated Cost (Operation and Maintenance): \$0.
