<b>Adjustment</b>		NA
<b>Other change**</b>		
<p>TALIS (Teaching and Learning International Survey) is an international survey of the teaching workforce, teaching as a profession, and the learning environments of schools. Data are collected through questionnaires from individual teachers and their school principals in lower secondary schools (grades 7, 8, and 9) in the United States. TALIS' main objective is to help countries review current policy and develop informed education policy by providing accurate and relevant international indicators on teachers and teaching. TALIS offers an opportunity for teachers and school principals to provide their perspectives on the state of education in their own countries. Both teacher and principal questionnaires include questions about teacher and principal background and characteristics; teacher and principal professional development; school leadership and management; teacher appraisal and feedback; teachers' instructional beliefs and pedagogical practices; school climate and ethos; student characteristics as perceived by the teacher; and teacher efficacy and job satisfaction. TALIS is sponsored by the Organization for Economic Cooperation and Development (OECD) and managed in the United States by the National Center for Education Statistics (NCES). This submission requests OMB's approval of edits to the materials for the fall 2012 recruitment of schools for the spring 2013 main study data collection.</p>
