

FR Y-14Q: International Home Equity Schedule Instructions

This document provides general guidance and data definitions for the International Home Equity Schedule. This schedule applies to international loans (not US or US territories) secured by real estate reported on line 1 of schedule HC-C of the FR-Y9C, that meet the loan criteria of line item 1.c.1 and 1.c.2.b of schedule HC-C of the FR-Y9C. Note that this includes international first lien and second lien home equity lines. For international first mortgages, see the separate instructions and schedules.

For the first reporting period (e.g., September 2011), BHCs should report monthly portfolio-level data for the international home equity portfolio by segments from January 2007 to the first reporting period. For subsequent periods, the reporting bank holding company (BHC) is required to report data for the months within the reporting period. The required segmentations are presented in Table A below. Report only owned loans. Include both held for investment (HFI) and held for sale (HFS) loans. More information on each of these segments can be found in section A of these instructions. Start each row of data with your BHC name (Variable name: BHC_NAME), your RSSD ID number (Variable name: RSSD_ID), the reporting month (Variable name: REPORTING_MONTH), and Portfolio ID (Variable name: PORTFOLIO_ID) (use **IntHE** for the portfolio ID within this schedule).

Table B below lists the summary variables that are to be reported for each portfolio segment. Definitions for each of these variables can be found in Section B, *Summary Variables*, of these instructions. **Provide all dollar unit data in millions of dollars (\$ Millions).**

Use variable names and formats provided in table A. **Detailed instructions on how to submit the data will be provided separately.** Reporting BHCs should provide a segment ID for each reported segment. This segment ID should be a unique twelve-digit identifier where each of the pairs of the twelve digits refers to a specific classification for each of the six segmentation categories. Refer to table A below for the attribute codes for the six segment categories. **Do not drop leading zeros.**

For the requested segment-level summary variables, report unpaid principal balance gross of any partial charge-offs that may have been taken on the loan. For the *\$ gross contractual charge-offs*, *\$ bankruptcy charge-offs*, *\$ recoveries*, and *\$ net charge-offs* report the dollar amount of charge-offs or recoveries for the segment only for the month that they occurred. For the delinquency status segment, categorize charge-offs or recoveries by delinquency status at charge-off. A summation of charge-offs or recoveries across the delinquency buckets for a given reporting month should thus result in the total charge-offs or recoveries recorded by the reporting BHC in that month.

A. Segments

For each of the summary variables and snapshot metrics (to be described in further detail in Section B, Section C, and Section D), information should be reported for the following segments:

1. **Product Type** – Reporting BHCs should segment the portfolio into product types based on specific features of the loan. The portfolio should be segmented into two product types:
 - a) HELOAN
 - b) HELOC

2. **Original FICO or equivalent** – Reporting BHCs should segment the portfolio by original FICO score or equivalent. Original FICO score or equivalent should be the score upon which the original underwriting decision was based. If the bank does not have original FICO scores, map the internal score or other bureau score used to the equivalent FICO score. Divide the portfolio into the following three segments:
 - a) ≤ 660
 - b) > 660
 - c) N/A—Original FICO or equivalent score is missing or unknown
3. **Geography** – Reporting BHCs should report the region in which the property is located; divide the portfolio into the following four geographical area designations:
 - a) Canada
 - b) EMEA—Europe, Middle East, and Africa
 - c) LATAM—Latin America and Caribbean
 - d) APAC—Asia Pacific
4. **Age** – Age refers to the amount of time that has elapsed since the account was originated. There are two possible ages to report:
 - a) \leq Three years old
 - b) $>$ Three years old
5. **Original LTV (or CLTV for 2nds)** – The original combined loan-to-value ratio is the original amount of the loan or line, in addition to any senior liens, divided by the property value at the time of origination. Divide the portfolio as follows:
 - a) < 80
 - b) ≥ 80
6. **Delinquency Status** – Divide the portfolio into the following five delinquency statuses:
 - a) Current & 1-29 DPD: Accounts that are not past due (accruing and non-accruing) or are 1-29 DPD (accruing and non-accruing) as of month-end.
 - b) 30-89 DPD: Accounts that are 30 to 89 days past due (accruing and non-accruing) as of month-end.
 - c) 90-119 DPD: Accounts that are 90 to 119 days past due (accruing and non-accruing) as of month-end.
 - d) 120-179 DPD: Accounts that are 120 to 179 days past due (accruing and non-accruing) as of month-end.
 - a) 180+ DPD: Accounts that are 180 or more days past due (accruing and non-accruing) as of month-end.

B. Summary Variables

For each of the segments described above and for each reference month, report information on the following summary variables:

1. **# Accounts** – Total number of accounts on the book for the segment as of month-end.

2. **\$ Outstandings** – Total principal amount outstanding as of the end of the month. This should be reported as unpaid principal balance (UPB) gross of any charge-offs. In other words, the \$ outstanding should not reflect any accounting based write-downs and should only be reduced to zero when the loan has been liquidated – either paid in full, charged off, or real estate owned (REO) sold.
3. **\$ Commitment (HELOC only)** – The total dollar amount of HELOC credit lines on the book for the segment as of month-end. If there is no credit limit on certain accounts, report the purchase or shadow limit. Report this variable only for HELOC products.
4. **# New accounts** – The total number of new accounts originated (or purchased) in the given month for the segment as of month-end.
5. **\$ New accounts** – The total dollar amount of new accounts originated (or purchased) in the given month for the segment as of month-end.
6. **\$ New commitments (HELOC only)** – The total dollar amount of new HELOC credit lines booked on the system in the reporting month. Report this variable only for HELOC products.
7. **\$ Commitment increases (HELOC only)** – The dollar amount increase on existing HELOC credit lines in the reporting-month. Report this variable only for HELOC products.
8. **\$ Commitment decreases (HELOC only)** – The dollar amount decrease on existing HELOC credit lines in the reporting-month. Report this variable only for HELOC products.
9. **\$ Gross contractual charge-offs** – The total unpaid principal balance for the segment that was contractually charged off during the month. All interim FFIEC write-downs should be included in gross contractual charge-offs in the month that they are taken. Report principal charge-offs only, not interest and fees. For the delinquency status segment, categorize charge-offs by the delinquency status at charge-off.
10. **\$ Bankruptcy charge-offs** – The total unpaid principal balance for the segment that was charged off due to bankruptcy as of month-end. Report principal charge-offs only, not interest and fees. For the delinquency status segment, categorize charge-offs by delinquency status at charge-off.
11. **\$ Recoveries** – The total dollar amount of any balance recovery collected during the month from previously charged-off loans for the segment as of month-end. For the delinquency status segment, categorize recoveries by delinquency status at charge-off. Recoveries should be reported as a positive value.
12. **\$ Net charge-offs** – The total unpaid principal balance for the segment that was charged-off in the reference month, net of any recoveries in the reference month. Report principal charge-offs only, not

interest and fees. Generally, *\$ net contractual charge-offs* should equal [*\$ gross contractual charge-offs + \$ bankruptcy charge-offs — \$ recoveries*].

13. **Adjustment factor to reconcile \$ gross contractual charge-offs to \$ net charge-offs** – If it is not the case that *\$ Net Charge-offs* equals [*\$ Gross Contractual Charge-offs + \$ Bankruptcy Charge-offs — \$ Recoveries*], provide the value of *\$ Net Contractual Charge-offs* minus [*\$ Gross Contractual Charge-offs + \$ Bankruptcy Charge-offs — \$ Recoveries*] in this variable. As a separate document included in the submission, provide an explanation for such a difference (for example, fraud losses are also included in the BHC's *\$ Net Charge-offs* variable). If the adjustment factor variable represents more than one factor leading to the difference, provide a separate breakout of the multiple factors.
14. **\$ Foreclosure** - The total unpaid principal balance of loans in the foreclosure process. These dollars are pre-REO and should be coded as a foreclosure in the system.
15. **\$ New foreclosure** - The total unpaid principal balance of loans that entered the foreclosure process in the reporting month. These dollars are pre-REO and should be coded as a foreclosure in the system.
16. **\$ Real estate owned (REO)** - The total Unpaid principal balance of mortgages where the bank has obtained the title at foreclosure sale and the property is on the market and available for sale. Also include instances where the bank has obtained the title but the availability for sale is not known
17. **\$ New REO** - The total unpaid principal balance of foreclosed loans where the institution has bought back the property in auction in the reporting month.
