Create [CIGARFILL] and repeat AG1003 and AG1004 for each product that the respondent has indicated that he or she used in questions AG9003, AG9006, AG9007 and AG9008.

Create [CIGARFILL]. If AG9003=1, [CIGARFILL]=cigar. If AG9004=1 AND (AG9006=1 OR AG9008=1), [CIGARFILL]=cigarillo. If AG9004=1 AND AG9007=1, [CIGARFILL]=filtered cigar.

Repeat the rest of the section once for each type of cigar the respondent has used (traditional cigars, cigarillos, filtered cigars). Display text below as follows:
For respondents who have used traditional cigars, but have not used cigarillos or filtered cigars: No display.
For all other respondents, display the following text each time they repeat the rest of the section. Add the last sentence only if they still have another CIGARFILL to answer questions about.
The next questions are about [CIGARFILL]. Please think only about your use of [CIGARFILLS] like those shown below as you answer these questions. [SHOW GENERIC IMAGE FOR CIGARFILL]. BOX APH1

The next questions are about smoking tobacco in pipes.

We first ask about smoking tobacco in a regular pipe. There are many different types of regular pipes. They all have a bowl that holds the tobacco and a stem. The picture below shows a typical pipe.
[GENERIC IMAGES OF PIPES]

We next ask about smoking tobacco in a hookah, which is a type of water pipe used to smoke tobacco. It is sometimes also called a "narghile" pipe. From now on, we will use "hookah" to refer to a water pipe or narghile pipe that is used to smoke tobacco. There are many types of hookahs. People often smoke tobacco in hookahs in groups at cafes or in hookah bars. The picture below shows a typical hookah.

For respondents that are ever users of cigarettes (EVER USER CIG = 1): go to cigarette section, then to sections (in order) for the other products they use (if any), then to questions A*1027, A*1080, A*1081 for all other products (in order) they have heard of but do not use (if any). Then for respondents who are dual or poly users, go to polyuse section, for all others go to nicotine dependence section. Complete remaining sections in order.

For respondents that have never used cigarettes (EVER USER CIG = 2): go to sections (in order) for the product or products they use. Then for respondents who are dual or poly users, go to polyuse section, for all others go to nicotine dependence section. Complete remaining sections in order.

Create a summary screen displaying responses to all questions used in the Phase 2 sampling algorithm and/or in setting tobacco use-defined groups. Allow respondent either to 1) confirm in a master checkbox that there are no changes (can mean either all correct or does not wish to answer any remaining missing questions), or 2) check individual items for correction/filling any still-missing data.

For the master checkbox, label it as "Check here if you do not want to make any {more} changes." [DISPLAY{more} IF RESPONDENT MAKES ANY CHANGES AND IS ROUTED BACK TO THIS BOX FOR CONFIRMATION AGAIN.

For any DK or RF response, display response as "Not answered".

For each item checkbox, label as "Check here to change" (if valid data) or "Check here to answer" (if missing).

Route the questionnaire back to each checked question and allow respondent to change answer. Save original answers in a history variable for each question. Apply the same missing probes or logic checks to any revisited question as specified for the initial administration of the question, e.g., probe for DK or Ref, but only once each.

After respondent has been routed through any checked items, display the summary screen again and allow further iterations until the respondent checks the master box.

Do not run the Phase 2 sampling algorithm until the respondent checks the master approval box.
