Trainee Survey

Instrument A: Pre-test

INFANT ADOPTION AWARENESS TRAINING PROGRAM

Participant Information

We are pleased that you have chosen to participate in the *Understanding Infant Adoption* training. As part of the Infant Adoption Awareness Training project, we are required to submit information documenting our efforts and their effect.

We would appreciate your response to a brief survey that will help us understand what knowledge you may already have about infant adoption, your reasons for taking the course, and your current role, if any, in adoption activities.

Completion of the form will take approximately 10 minutes and is voluntary. During the workshop you will also have an opportunity to evaluate the training and its effectiveness. As the final stage in our evaluation, we will follow up with you by email, asking you to complete a brief follow-up survey. All information you provide will help us to evaluate and improve the training, support services, and materials.

Your responses will be confidential throughout this process. This means that your name will not appear in any written reports, and your name will not be associated with any comments you choose to make about the program. Data will be presented only in aggregate form.

You may decline to participate without penalty. If you decide to participate, you may withdraw from the evaluation at any time without penalty and without loss of benefits to which you are otherwise entitled.

Completion of the survey indicates you have read the above information and agree to participate in data collection for evaluation of the Understanding Infant Adoption Training program.
