#### **FORM STB-54 INSTRUCTIONS**

#### SECTION A: CARS ORIGINATED

Section A covers each time a revenue freight car (railroad or private) is loaded at origination with either revenue or non-revenue commodities. The types of cars to be included are listed below by mechanical designations, car type codes, and appropriate line code.

- 1. Report total number of cars loaded for initial road haul on your railroad, by types, separated between loads in railroad cars and loads in private cars, during the year ended at midnight December 31, including cars received under load from dependent short lines; also including company material of reporting road or other non-revenue freight when loaded in revenue cars. Cars loaded with empty trailers or containers, twenty (20) feet or over in length, should be included.
- 2. Cars loaded in switching service for initial road haul movement by connections to be reported by the road haul carrier performing the billing of the cars
- 3. Cars loaded for intra- or inter-terminal switch movement only (no road haul) to be reported by the loading road.

#### SECTION B: CARS TERMINATED

Report total number of loads terminated on line, by types, separated between railroad cars and private cars, during the last calendar year ending at midnight December 31, including cars delivered to dependent short lines for unloading; also company material of reporting road or other non-revenue commodities when unloaded from revenue cars. Count should include cars from which empty piggyback trailers or containers, twenty (20) feet or over in length, are unloaded. Loaded cars delivered to a connection for switch delivery which received final road haul on your railroad should be reported as terminated on your line. Conversely, loaded cars which you receive from a connection for switch delivery should not be reported as terminated on your line. All loads which you originate in switch service for intra- and inter-terminal switch delivery should, also, be reported as terminated on your line.

#### SECTION C: SHIPMENTS ORIGINATED

Section C covers each time a revenue shipment (in railroad or privately owned equipment) is loaded at origination with either revenue or non-revenue commodities. For the purpose of this form, a shipment is defined as a block of one or more cars moving under the same waybill from origin to destination. The types of cars to be included are listed below by mechanical designations, car type codes, and appropriate line code.

- 1. Report total number of shipments loaded for initial road haul on your railroad, by types, separated between shipments in railroad cars and shipments in private cars, during the year ended at midnight December 31, including shipments received under load from dependent short lines; also including company material of reporting road or other non-revenue freight when loaded in revenue cars. Shipments loaded with empty trailers or containers, twenty (20) feet or over in length, should be included.
- 2. Shipments loaded in switching service for initial road haul movement by connections to be reported by the road haul carrier performing the billing of the shipments.
- 3. Shipments loaded for intra- or inter-terminal switch movement only (no road haul) to be reported by the loading road.

#### SECTION D: SHIPMENTS TERMINATED

Report total number of shipments terminated on line, by types, separated between shipments moving in railroad cars and private cars, during the last calendar year ending at midnight December 31, including shipments delivered to dependent short lines for unloading; also company material of reporting road or other non-revenue commodities when unloaded from revenue cars. Count should include shipments from which empty piggyback trailers or containers, twenty (20) feet or over in length, are unloaded. Shipments delivered to a connection for switch delivery which received final road haul on your railroad should be reported as terminated on your line. Conversely, shipments which you receive from a connection for switch delivery should not be reported as terminated on your line. All shipments which you originate in switch service for intra- and inter-terminal switch delivery should, also, be reported as terminated on your line.

#### Supplemental Information about the Annual Report of Cars and Shipments Originated and Terminated (Form STB-54)

The following information is provided in compliance with OMB requirements and pursuant to the Paperwork Reduction Act of 1995, 44 U.S.C. §§ 3501-3519 (PRA):

This information collection is mandatory pursuant to 49 U.S.C. § 11162 and 49 C.F.R. § 1247. The estimated hour burden for filing this report is four hours per report. The Board uses information in this report to forecast labor costs and measure the efficiency of the reporting railroads. Information in this report is entered into the Board's Uniform Rail Costing System (URCS), which is a cost measurement methodology. URCS was developed by the Board pursuant to 49 U.S.C. § 11161 and is used as a tool in rail rate proceedings to calculate the variable costs associated with providing a particular service in accordance with 49 U.S.C. § 10707(d). The Board also uses URCS to analyze the information that it obtains through the annual railroad industry waybill sample, see 49 C.F.R. § 1244, and in railroad abandonment proceedings to measure off-branch costs in accordance with 49 C.F.R. § 1152.32(n). In addition, many other federal agencies, including the Department of Transportation, and many industry groups depend on Form STB-54 for information regarding the number of cars loaded and terminated on the reporting carrier's line. All information collected through this report is available to the public. Paper copies of individual reports are maintained by the Board for ten years, after which they are destroyed. Under the PRA, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with, a collection of information unless it displays a currently valid OMB control number. Comments and questions about this collection (2140-0011) should be directed to Paperwork Reduction Officer, Surface Transportation Board, 395 E Street, S.W., Washington, D.C. 20423-0001.
