

**Nonsubstantive Change Request
10 CFR 50.54(hh)**

The purpose of this nonsubstantive change request is to add 6,110 hours into 10 CFR Part 50 for requirements contained in 10 CFR 50.54(hh). The hours for these requirements were originally included in 10 CFR 73 as part of the Power Reactor Security Requirements final rule (approved in April 2009). When 10 CFR 73 was renewed in February 2012, the hours associated with 50.54(hh) were removed, with the intention of transferring these hours into Part 50 via nonsubstantive change request.

The requirements are as follows:

Section 50.54(hh)(1) requires licensees to develop, implement, and maintain procedures to address preparatory actions to be taken in the event of a potential aircraft threat to a nuclear power reactor facility.

Section 50.54(hh)(2) requires licensees to develop and implement guidance and strategies to address the loss of large areas of the plant due to explosions or fires from a beyond-design basis threat.

The current request adds 6,110 recordkeeping hours into 10 CFR 50. No recordkeeping responses were added to Part 50, because all 65 recordkeepers are already counted as recordkeepers under other sections of Part 50.

Implementation requirements:

Section	No. of Recordkeepers	No. of Records per Recordkeeper	Annualized One-Time Hours per Recordkeeper	Total One-Time Burden
50.54(hh)(1)	65	1	27	1,755
50.54(hh)(2)	65	1	27	1,755

Annual requirements:

Section	No. of Recordkeepers	No. of Records per Recordkeeper	Annual Hours per Recordkeeper	Total Annual Burden
50.54(hh)(1)	65	1	40	2,600
