

continue to be periodically conducted to maintain the natural 5 to 15 year fire cycle, depending on the forest type and location. Aerial and manual ignitions would be used.

* Maintain selected roads needed for access. Road maintenance includes smoothing out road surfaces, improving drainage, and stabilizing stream crossings.

* Open closed roads where needed for access and wood removal. Conduct road maintenance on these roads as needed. Roads would be closed after they are no longer needed.

* Eliminate unnecessary roads and trails (routes) through decommissioning. This can include physically closing a route to public use while maintaining that route for occasional administrative access by Forest Service personnel or specified permittees. Various methods would be used depending on site-specific conditions and land uses. Decisions about access are not included in this project.

* Constructing temporary roads where needed for access and wood product removal. After the temporary roads are no longer needed, they would be obliterated. No new permanent roads would be constructed.

* Maintain the road system by developing new and/or expanding existing gravel pits.

* Restore stream and riparian ecosystems to help improve water quality, fish habitat, riparian and meadow habitat, and watershed functions. Treatments include: Tilling and seeding denuded campsites and trails to encourage vegetation; installing structures to control erosion and stabilize stream banks and stream-road crossings; planting native riparian vegetation along stream corridors; placing logs in streams to improve pool formation and aquatic habitat conditions; protecting large meadow habitat; installing riparian enclosure fences or barriers to reduce elk and livestock use along streams; treating headcuts in arroyos in riparian meadows; thinning toe slopes and creating large woody debris; controlling invasive plants; and replacing, repairing, or installing water sources to encourage elk and cattle use in the uplands.

* Improve and enhance wildlife habitat by cutting encroaching conifers to restore upland and riparian grassy meadow habitat; regenerating aspen stands by cutting encroaching conifers and conducting prescribed burns; maintaining existing water sources and/or constructing new water sources; screening wildlife water sources; creating snags; restoring upland and

floodplain meadows; removing Kentucky bluegrass and reestablishing native bunchgrasses; and maintaining the desired amount of downed logs, snags, and forest floor down woody debris.

* Protect cultural resources by reducing fuel and controlling erosion on archaeological sites and reducing fuel on traditional cultural properties and sacred sites.

All proposed thinning, mowing (of tree seedlings), and prescribed fire treatments may be used indefinitely after the initial treatments to maintain or further reduce tree densities and fuel loads.

Possible Alternatives

A full range of alternatives to the proposed action, including a no-action alternative, will be considered. The no-action alternative represents no change and serves as the baseline for the comparison among the action alternatives.

Responsible Official

The responsible official is the Forest Supervisor of the Santa Fe National Forest.

Decision To Be Made

The Forest Supervisor—the Responsible Official for this project—will decide whether or not to implement the proposed activities on all or portions of the 110,000-acre analysis area using one or more of the methods described. She will also decide which forest plan amendments to adopt.

Permits or Licenses Required

The discharge of dredged and fill material resulting from the instream habitat improvement treatments requires a Section 404 permit from the U.S. Army Corps of Engineers.

The discharge of pollutants (sediment) to waters of the U.S. requires a Clean Water Act 401 Water Quality Certification and a Clean Water Act 402 National Pollutant Discharge Elimination System (NDPES) permit from the New Mexico Environment Department.

Consult with and obtain concurrence from the U.S. Fish and Wildlife Service on the listed species to address and on the biological assessment, and continue consultation with the U.S. Fish and Wildlife Service in accordance with Section 7 of the Endangered Species Act.

Consult with the New Mexico State Historic Preservation Officer, tribes, and consulting parties regarding identification, evaluation, and determination of effects of the project on

cultural resources in accordance with Section 106 of the National Historic Preservation Act.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the environmental impact statement. Ongoing collaborative efforts regarding restoration in the Southwest Jemez Mountains will continue. A variety of public involvement and collaboration activities such as open house meetings, field trips, and interagency workshops will be scheduled beginning in July 2012. Public meetings are tentatively scheduled for July 24, 26, 31 and August 2, 2012. The dates, times, and locations of the public scoping meetings will be posted on the forest's Web site at: http://www.fs.usda.gov/detail/santafe/home/?cid=FSBDEV7_021009.

It is important that reviewers provide their comments by the closing date and in such a manner that they are useful to the agency's preparation of the environmental impact statement. Therefore, comments should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will become part of the public record for this proposed action. Comments submitted anonymously will be accepted and considered, however.

Dated: July 5, 2012.

Maria T. Garcia,

Forest Supervisor.

BILLING CODE 3410-11-P

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Information Collection Activity; Comment Request

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended), the Rural Utilities Service, an agency delivering the U.S. Department of Agriculture (USDA) Rural Development Utilities Programs, invites comments on this information collection for which approval from the Office of Management and Budget (OMB) will be requested.

DATES: Comments on this notice must be received by September 10, 2012.

FOR FURTHER INFORMATION CONTACT:

Michele Brooks, Deputy Director, Program Development and Regulatory Analysis, USDA Rural Development, 1400 Independence Ave. SW., STOP 1522, Room 5162 South Building, Washington, DC 20250-1522. Telephone: (202) 690-1078. Fax: (202) 720-8435. Email: michele.brooks@usda.gov.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget's (OMB) regulation (5 CFR 1320) implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104-13) requires that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). This notice identifies an information collection that will be submitted to OMB for approval.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to: Michele Brooks, Deputy Director, Program Development and Regulatory Analysis, USDA Rural Development, STOP 1522, 1400 Independence Ave. SW., Washington, DC 20250-1522. Fax: (202) 720-8435.

Title: RUS Form 675, Certification of Authority.

OMB Control Number: 0572-0074.

Type of Request: Extension of a currently approved collection.

Abstract: The Rural Utilities Service (RUS) manages loan programs in accordance with the Rural Electrification Act of 1936, as amended (7 U.S.C. 901 *et seq.*) (RE Act). A major factor in managing loan programs is controlling the advance funds, including assuring that actual borrowers receive their funds. OMB Circular A-123, Management Accountability and Control, provides that information should be maintained on a current basis and that funds should be protected from unauthorized use. The use of RUS Form 675 allows effective control against

unauthorized release of funds by providing a list of authorized borrower signatures against which signatures requesting funds are compared. Form 675 allows borrowers to keep RUS up-to-date of changes in signature authority and controls release of funds only to authorized borrower representatives.

Estimate of Burden: Public reporting for this collection of information is estimated to average .10 hours per response.

Respondents: Not-for-profit institutions; Business or other for-profit.

Estimated Number of Respondents: 250.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 25.0 hours.

Copies of this information collection can be obtained from Michele Brooks, Program Development and Regulatory Analysis, at (202) 690-1078. Fax: (202) 720-3485. Email:

michele.brooks@usda.gov.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Dated: July 2, 2012.

Jonathan Adelstein,

Administrator, Rural Utilities Service.

Certain Frozen Warmwater Shrimp From India: Final Results of Antidumping Duty Administrative Review and Final No Shipment Determination

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: On March 6, 2012, the Department of Commerce (the Department) published the preliminary results of the administrative review of the antidumping duty order on certain frozen warmwater shrimp (shrimp) from India. The period of review (POR) is February 1, 2010, through January 31, 2011.

Based on our analysis of the comments received, we have made certain changes to the margin calculations. Therefore, the final results differ from the preliminary results. The final weighted-average dumping margins for the reviewed firms are listed

below in the section entitled "Final Results of Review."

DATES: *Effective Date:* July 11, 2012.

FOR FURTHER INFORMATION CONTACT: Elizabeth Eastwood or Henry Almond, AD/CVD Operations, Office 2, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC, 20230; telephone (202) 482-3874 or (202) 482-0049, respectively.

SUPPLEMENTARY INFORMATION:

Background

This review covers 184 producers/exporters. The respondents which the Department selected for individual examination are Apex Exports (Apex) and Falcon Marine Exports Limited (Falcon). The respondents which were not selected for individual examination are listed in the "Final Results of Review" section of this notice.

On March 6, 2012, the Department published in the **Federal Register** the preliminary results of administrative review of the antidumping duty order on shrimp from India.¹

Also in March 2012, the Department verified the sales and cost data reported by Falcon, in accordance with section 782(i) of the Tariff Act of 1930, as amended (the Act).

In April 2012, in response to a request from the Department, Kay Kay Exports (Kay Kay), a respondent not selected for individual examination, clarified its statement of no shipments. For further discussion, see the "Determination of No Shipments" section of this notice.

We invited parties to comment on the *Preliminary Results* of review. In May 2012, we received case and rebuttal briefs from the Ad Hoc Shrimp Trade Action Committee (the petitioner), the American Shrimp Processors Association (the processors), and Apex, Falcon, and Kay Kay (collectively, "the respondents").

The Department has conducted this administrative review in accordance with section 751 of the Act.

Scope of the Order

The scope of this order includes certain frozen warmwater shrimp and prawns, whether wild-caught (ocean harvested) or farm-raised (produced by aquaculture), head-on or head-off, shell-on or peeled, tail-on or tail-off.²

¹ See *Certain Frozen Warmwater Shrimp From India: Preliminary Results of Antidumping Duty Administrative Review, and Preliminary No Shipment Determination*, 77 FR 13275 (Mar. 6, 2012) (*Preliminary Results*).

² "Tails" in this context means the tail fan, which includes the telson and the uropods.
