

Item Number	Wording
	Now I have some questions on a different topic. First, I will ask you about four different numbers that you may have heard of or read about on the radio, TV, newspapers, the Internet, or somewhere else.. (ROTATE Q1-Q4)
FS1	Do you happen to know who measures the total number of people in the U.S., or the population count?
FS2	Do you happen to know who measures the number of deaths in the U.S. caused by different diseases?
FS3	Do you happen to know who measures the crime rate in the U.S.?
FS4	Do you happen to know who measures the U.S. Consumer Price Index or CPI ?
FS5	Numbers like the ones I just mentioned are federal statistics produced by federal statistical agencies that are part of the federal government. Have you ever <i>used</i> federal statistics for study or work?
FS6	Personally, how much trust do you have in the federal statistics in the United States? Would you say that you tend to trust federal statistics or tend not to trust them?
FS7	Please tell me, do you Strongly agree, Somewhat agree, Neither agree nor disagree, Somewhat disagree, or Strongly disagree with the following statements: (ROTATE 7-14)
FS8	Policy makers need federal statistics to make good decisions about things like federal funding.
FS9	Statistics provided by federal agencies are generally accurate.
FS10	Statistics provided by federal agencies are often biased.
FS11	Elected officials interfere with the production of statistics by federal agencies
FS12	People can trust federal statistical agencies to keep information people can easily find out about exactly how federal statistics are produced
FS13	Federal statistical agencies are honest
FS14	Federal statistical agencies are a reliable source for high quality statistics
FS15	Now I'm going to read you a list of organizations in American society. Please tell me how much confidence you, yourself, have in each one – a great deal, quite a lot, some or very little? (Read and rotate Q15--Q19)
FS16	Newspapers
FS17	The military
FS18	Federal statistical agencies
FS19	Congress
	Universities

In order to produce statistics, federal agencies can ask people for information in a survey or get it from another source. If you knew your name and other information would never be singled out and would only be used for statistics, would you prefer that federal statistical agencies:

FS20 Ask you for your employment information in a survey -- or ask a state agency, like the employment or workforce office for it?

FS21 Ask you for information on your use of healthcare services in a survey -- or ask your insurance company for it?

FS22 Ask you about the cost of products you buy in a survey -- or use commercial records, like grocery store loyalty cards?

FS23 Ask you for your earnings history information from you in a survey -- or ask the Social Security Administration for it?|

FS24 Ask you for your income information from you in a survey -- or ask the IRS for it?|

FS25 Next, a question about the U.S. Government as a whole. Do you think federal government agencies share a single central database of the name, address and date of birth of U.S. residents?

FS26a The National Center for Health Statistics, or the NCHS, collects information on people's health and medical care through a variety of surveys. The NCHS could obtain some of your medical information from your health care provider instead of asking you on a questionnaire. If you knew that this information was only being obtained to produce statistics, and that your personal information would remain unavailable to the public, would you be *strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it*?

FS27a The National Center for Health Statistics spends over \$100 million on surveys every year. To reduce this cost, it could get some of your medical information from your health care provider. If this method could save government money, *are you strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it*?

FS28a If you are selected for one of these health surveys, they can take a lot of time. They often ask people to recall detailed medical histories, doctors' visits, and treatments. If the NCHS could save you the time and hassle by getting some of your medical information from your health care provider, would you be *strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it*?

A lot of the information asked on these health surveys may be difficult for a person to recall accurately, but a health care provider may already have this information. If the NCHS could improve the accuracy of their numbers by asking your health care provider for some of your medical information, would you be *strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?*

FS29a Information from these health surveys help make funding decisions for cancer research, elderly medical care, and hospitals. If the NCHS could obtain some of your medical information from health care provider to get a better idea of the health care needs of the nation, would you be *strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?*

FS30a You seem to be [in favor of/not in favor of] the NCHS obtaining some of your medical information from your health care provider. Can you tell me why?

FS31a

The National Center for Health Statistics, or the NCHS, collects information on people's health and medical care through a variety of surveys. The NCHS could obtain some of your medical information from your health care provider instead of asking you on a questionnaire. If you knew that this information was only being obtained to produce statistics, and that your personal information would remain unavailable to the public, how would you feel about the NCHS obtaining your medical information from your health care provider? Would you be *strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?*

FS26a

Now I will read you some benefits of the NCHS obtaining medical information from health care providers. For each statement, please tell me if these social benefits would make you *strongly in favor of this, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it.* Getting information from healthcare providers would help save some of the \$100 million in government money that the NCHS spends on surveys every year (READ IF NECESSARY: Would this make you *strongly in favor of the NCHS obtaining your medical information from your health care provider, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?*)

FS27a Getting information from healthcare providers would reduce the time and effort it takes people like you to participate in NCHS surveys that require people to recall detailed medical histories, doctors' visits, and treatments (READ IF NECESSARY: Would this make you *strongly in favor of the NCHS obtaining your medical information from your health care provider, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?*)

FS28a

FS29a Getting information from healthcare providers would improve the accuracy of NCHS numbers, especially for people who have difficulty accurately recalling their medical history. (READ IF NECESSARY: Would this make you strongly in favor of the NCHS obtaining your medical information from your health care provider, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)

FS30a Getting information from healthcare providers would help NCHS get a better idea of the health care needs of the nation which would allow them to make better funding decisions for cancer research, elderly medical care and hospitals. (READ IF NECESSARY: Would this make you strongly in favor of NCHS obtaining your medical information from your health care provider, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)

FS31a You seem to be [IF CODE 1 IN FS32a: in favor of] the NCHS obtaining some of your medical information from your health care provider. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)

FS31b You seem to be [IF CODE 2 IN FS32a: not in favor of] the NCHS obtaining some of your medical information from your health care provider. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)

FS31c You seem to be [IF CODE 3 IN FS32a: neither strongly in favor of nor against] the NCHS obtaining some of your medical information from your health care provider. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)

FS26a For the next census in 2020, the Census Bureau could obtain your name and age directly from the Social Security Administration, instead of asking you for this information on a questionnaire. If you knew that this information was being obtained from the Social Security Administration only to produce statistics, and that your personal information would remain unavailable to the public, would you be strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?

Now I will read you some benefits of the Census obtaining name and age information from the Social Security Administration. For each statement, please tell me if these social benefits would make you strongly in favor of this, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it.

- FS27a The 2010 Census cost over \$10 billion dollars. Getting your name and age directly from the Social Security Administration could reduce the cost for the 2020 Census and save government money. (READ IF NECESSARY: Would this make you strongly in favor of Census obtaining your name and age from the Social Security Administration, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)
- FS28a Various government agencies ask you to provide the same information on a number of different forms. Getting your name and age directly from the Social Security Administration could save you the time and hassle from providing it again to the Census Bureau. (READ IF NECESSARY: Would this make you strongly in favor of Census obtaining your name and age from the Social Security Administration, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)
- FS29a Some American households don't return their census forms, and as a result the census numbers may be incomplete. Getting names and ages from the Social Security Administration could help the Census Bureau improve the accuracy of their numbers for the people who were missed by the census. (READ IF NECESSARY: Would this make you strongly in favor of Census obtaining your name and age from the Social Security Administration, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)
- FS30a Getting names and ages from the Social Security Administration could help the Census Bureau get a better idea of population sizes and thus know where local, state, and federal agencies build new schools, roads, and firehouses. (READ IF NECESSARY: Would this make you strongly in favor of Census obtaining your name and age from the Social Security Administration, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)
- FS31a You seem to be [IF CODE 1 IN FS32a: in favor of] the Census obtaining your name and age from the social Security Administration. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)
- FS31b You seem to be [IF CODE 2 IN FS32a: not in favor of] the Census obtaining your name and age from the social Security Administration. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)
- FS31c You seem to be [IF CODE 3 IN FS32a: neither strongly in favor of nor against] the Census obtaining your name and age from the social Security Administration. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)

The Bureau of Labor Statistics, or BLS, conducts surveys with people like you to determine the rate of inflation, or how much it costs to live in the U.S. However, instead of asking you in a survey, the BLS could obtain some information about your purchases directly from a supermarket loyalty card that keeps track of your purchases. If you knew that BLS was obtaining this information only to produce statistics, and that your personal information would remain unavailable to the public, would you be *strongly in favor of it, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?*

FS26a

Now I will read you some benefits of the BLS obtaining information about some of your purchases from a supermarket loyalty card program. For each statement, please tell me if these social benefits would make you strongly in favor of this, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it.

Getting information about some of your purchases from a supermarket loyalty card program would help the BLS calculate statistics to determine social security payments and wage increases and to set interest rates and to set Cost of Living Allowance for military and seniors. (READ IF NECESSARY: Would this make you strongly in favor of the BLS obtaining information about some of your purchases from a supermarket loyalty card program, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)

FS27a

Completing a survey about all your purchases takes a lot of time and effort. Getting information about some of your purchases from a supermarket loyalty card program could save you the time and effort of keeping a diary of your purchases or answering a long series of detailed questions. (READ IF NECESSARY: Would this make you strongly in favor of the BLS obtaining information about some of your purchases from a supermarket loyalty card program, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)

FS28a

Many of the costs asked on such a survey about purchases may be difficult for people to answer accurately. Getting information about some of your purchases from a supermarket loyalty card program, instead of asking people to remember it, could improve the accuracy of the inflation rate. ((READ IF NECESSARY: Would this make you strongly in favor of the BLS obtaining information about some of your purchases from a supermarket loyalty card program, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)

FS29a

Getting information about some of your purchases from a supermarket loyalty card program would help save some of the \$40 million in government money that the BLS spends every year collecting the data needed to calculate the inflation rate. (READ IF NECESSARY: Would this make you strongly in favor of the BLS obtaining information about some of your purchases from a supermarket loyalty card program, somewhat in favor of it, neither in favor nor against it, somewhat against it, or strongly against it?)

FS30a

You seem to be [IF CODE 1 IN FS32a: in favor of] the BLS obtaining some of your information directly from supermarkets. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)

FS31a

You seem to be [IF CODE 2 IN FS32a: not in favor of] the BLS obtaining some of your information directly from supermarkets. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)

FS31b

You seem to be [IF CODE 3 IN FS32a: neither strongly in favor of nor against] the BLS obtaining some of your information directly from supermarkets. Can you tell me why? (OPEN ENDED AND CODE. DO NOT READ CATEGORIES)

FS31c
