Data from this survey are used to compute the index of Prices Paid by Farmers. This index measures price trends and changes that affect farm production input costs. Specifically, data from this survey are used for:

1. Evaluation of Farm policy and legislation.
2. Updating cost of production estimates used in determination of net farm income.
3. Computation of Parity Prices for selected agricultural commodities.

Individual reports are kept confidential. Response to this survey is voluntary and not required by law. However, your cooperation is very important in order to estimate these prices accurately. Please mail your report promptly in the enclosed postage paid envelope.

*Please make corrections to name, address and Zip Code, if necessary.*

Thank you for your cooperation.

**INSTRUCTIONS**

- Report prices currently in effect.
- Report prices only for items sold.
- Prices should be reported on a bulk basis if most sales are made in bulk form.
- Deduct any discounts normally given.
- Report an average price for the **most commonly** sold, not a range of prices.
- Exclude cost of application for Nitrogen Solutions and Anhydrous Ammonia. Include cost of application for ground limestone.
- Exclude sales tax.
- Report prices for the ACTIVE INGREDIENTS specified in the questionnaire. Chemical trade names have been given to assist with the reporting process and are only examples of what may exist for each active ingredient.

1. Does this operation have Fertilizers and/or Agricultural Chemicals on hand for sale to farmers in the U.S. during April 2008?

**Yes** - [Go to **Question 3.**]

**No** - [Go to **Question 2.**]

2. Will this operation have Fertilizers and/or Agricultural Chemicals on hand for sale to farmers in the U.S. in the future?

**1 Yes** - Please return this form.

**3 No** - Please return this form.

3. Report price per unit of Fertilizers and/or Agricultural Chemicals on hand for sale to farmers in the U.S. during April 2008 in the following tables.
