

**Note to File - 24 Month - Administration of Ages and Stages 3 Questionnaire (ASQ-3)**

At present, the NCS is approved to administer the ASQ-3 at 24 months. In practice, if the 24-Month Interview is scheduled outside of the 24-Month ASQ-3's window of administration, then the ASQ-3 would not be administered during the visit. Therefore, we also request approval for use of the 27- and 30-Month Ages and Stages Questionnaires (ASQ) Self-Administered Questionnaire in addition to the currently approved 24-Month ASQ in order to broaden the window of administration for the 24-Month Interview. As a point of information, the ASQ-3 may only be administered once for a given visit. For example, if the ASQ-3 was administered at 24 months, it would not be administered again.
