Access rights to the data are granted to limited researchers on a need-to-know basis, and the level of access provided to each researcher is based on the minimal level required that individual to fulfill his research role. All data users will be aware of and trained on their responsibilities to protect participants' personal information, including the limitations on uses and disclosures of data. Backup media will be encrypted. Data will never be stored on a laptop or on a movable media such as CDs, diskettes, or USB flash drives without encryption. Hardcopy files: All hard copy forms with personal identifying data (the participant agreement/informed consent form) will be stored securely in a locked cabinet that can only be accessed by authorized individuals working on the data. The locked cabinet will be stored in a locked office in a limited-access building, (e.g. Study team interviewers will securely store any hard copy documents with personal protected information, such as tracking letters.)

RETENTION AND DISPOSAL PROCESS:

Records Disposition Schedule,² 2225.6, REV-1, Appendix 67, Policy Development and Research Records, provides disposition instructions for Headquarters and Field Office records produced in connection with activities conducted under Title V of the Housing and Urban Development Act of 1970 (Pub. L. 91-609, 84 Stat. 1784; 12 U.S.C. 17Dl1z-1). Per the Records Disposition Schedule 67, project case files reflecting a complete history of each project from initiation through research, development, design, testing, and demonstration, records should retire to Federal Records Center 3 years after satisfactory close of project that volume warrants. Destroy 6 years after satisfactory close of project. (NARA Job NCI-207-78-6, item 5). In accordance with the Records Disposition Schedule, the Contractor will return all electronic and hard copy study records to PD&R under the retention period for records. Hard copy forms that are no longer needed for the study will be shredded. The data will not be used after the final acceptance of the report by HUD. Upon request of the agency, Abt Associates will permanently destroy all electronic personally-identifiable information on the system using the methods described by the NIST SP 800-88 "Guidelines for

Media Sanitization" (September 2006). Encrypted versions of the data may remain on backup media for a longer period of time, but will be similarly permanently destroyed.

SUPPLEMENTARY INFORMATION:

Title: National Institutes for Water Resources (NIWR) USGS Competitive Grant Program.

OMB Control Number: 1028–0095.

Abstract: The NIWR–USGS National Competitive Grant Program issues an annual call for proposals to support research on water problems and issues of a regional or interstate nature beyond those of concern only to a single state and which relate to specific program priorities identified jointly by the USGS and the state water resources research institutes authorized by the Water Resources Research Act of 1984, as amended (42 U.S.C. 10301 et seq.). The program is conducted in conjunction with the State Water Resources Research Institutes. The NIWR cooperates with the USGS in establishing total programmatic direction, reporting on the activities of the Institutes, coordinating and facilitating regional research and information and technology transfer, and in operating the NIWR–USGS Student Internship Program. Any investigator at an accredited institution of higher learning in the United States is eligible to apply for a grant through a water research institute or center established under the provisions of the Act. Proposals involving substantial collaboration between the USGS and university scientists are encouraged. Proposals may be for projects of 1 to 3 years in duration and may request up to \$250,000 in federal funds. Successful applicants must match each dollar of the federal grant with one dollar from nonfederal sources. An annual progress and final technical report for all projects is required at the end of the project period. This program is authorized by the Water Resources Research Act of 1984, as amended (42 U.S.C. 10303(g)).

No questions of a “sensitive” nature are asked.

Frequency of Collection: Annually.

Affected Public: Research investigators at accredited institutions of higher education.

Respondent's Obligation: Voluntary (necessary to receive benefits).

Estimated Number of Respondents: We expect to receive approximately 65 applications and award 7 grants per year.

Estimated Annual Reporting and Recordkeeping “Hour” Burden: We estimate the annual reporting burden to be 3,984 hours. This includes 60 hours per applicant to prepare and submit the application; and 12 hours (total) per grantee to complete the interim and final technical reports.

Estimated Annual Reporting and Recordkeeping “Non-Hour Cost”: We have not identified any “non-hour cost” burdens associated with this collection of information.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, et seq.) provides that an agency may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

Comments: To comply with the public consultation process, on August 28, 2012, we published a **Federal Register** notice (77 FR 52052) announcing that we would submit this ICR to OMB for approval. The notice provided the required 60-day public comment period, which ended October 29, 2012. In response to our **Federal Register** Notice, we received one comment, which consisted of a general invective about the U.S. Government and did not pertain to this information collection. We are again soliciting comments as to: (a) Whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information; (c) how to enhance the quality, usefulness, and clarity of the information to be collected; and (d) how to minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology. Please note that the comments submitted in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask OMB in your comment to withhold your personal

identifying information from public review, we cannot guarantee that it will be done.

Dated: December 27, 2012.

Acting Chief, Office of External Research, U.S. Geological Survey.
