OTC Derivatives Dealer: _____ as of _____

SCHEDULE I
CREDIT-CONCENTRATION REPORT FOR TWENTY LARGEST CURRENT NET EXPOSURES

Counterparty Identifier (1)	Country (2)	Industry Segment (3)	Rating (4)	Gross Replacement Value (5)		Net Replacement Value (6)	Current Net Exposure (7)	Total Credit Exposure (8)	Comments (9)
				Receivable (Gross Gain)	Payable (Gross Loss)				
Totals									

- (1) Identify counterparty by counterparty's corporate name.
- (2) Identify country exposures by residence of main operating company.
- (3) Report on a counterparty-by-counterparty basis by type of entity in accordance with ISDA guidelines (i.e., Primary ISDA Members, Non-Primary ISDA Members, Corporates, Financial Institutions, Government/Supranationals, or Other).
- (4) Ratings are Nationally Recognized Statistical Rating Organization ("NRSRO") ratings or internal credit ratings as assigned by the firm. See Schedule IV for conversion of firm ratings into NRSRO equivalent ratings.
- (5) Report gross replacement value (receivable and payable), excluding the effect of legally enforceable netting agreements and excluding the application of collateral.
- (6) Report net replacement value, including the effect of legally enforceable netting agreements but excluding the application of collateral.
- (7) Report current net exposure, including the effect of legally enforceable netting agreements and the application of collateral.
- (8) Report the sum of the current net exposure and the potential additional credit exposure (calculated as the maximum credit exposure expected to be exceeded with a probability of one percent over a two-week period, less current net exposure).
- (9) Provide additional relevant information (e.g., details on credit enhancements, type of contract, maturity, offsetting, significant additional exposures in affiliated entities, etc.).

FORM X-17A-5, PART IIB

GENERAL INSTRUCTIONS

The FOCUS Report (Form X-17A-5IIB) constitutes the basic financial and operational report required of OTC derivatives dealers. Much of the information required by the FOCUS report is the same or similar to the information required to be reported by broker-dealers required to file Form X-17A-5 Part II. Consequently, for those items that appear on both forms, the instructions for X-17A-5 Part II are to be followed when completing Form X-17A-5 Part IIB. The following instructions apply to new information requests and to items appearing on both forms that have been altered to better reflect an OTC derivatives dealer's unique business.

Computation of Net Capital and Required Net Capital (Under Rule 15c3-1 Appendix F)

For purposes of paragraph (a)(5) of Rule 15c3-1 of this chapter (§240.15c3-1, the term "tentative net capital" means the net capital of an OTC derivatives dealer before deducting the charges for market and credit risk as computed pursuant to Appendix F and increased by the balance sheet value (including counter-party net exposure) resulting from transactions in eligible OTC derivative instruments which would otherwise be deducted by virtue of paragraph (c)(2)(iv) of Rule 15c3-1.

Market risk exposure

The capital requirement for an OTC derivatives dealer electing to apply Appendix F of Rule 240.15c3-1 is computed as follows:

- (1) *Value-at-Risk.* An OTC derivatives dealer shall deduct from net worth an amount for market risk exposure for eligible OTC derivatives transactions and other positions in its proprietary or other accounts equal to the value at risk ("VAR") of these positions obtained from its proprietary VAR model, multiplied by the appropriate multiplication factor. See paragraph (e)(1)(v)(C) of Appendix F for more information on the multiplication factor. The proprietary model used to calculate the capital requirement for market risk must be approved by the Commission prior to its use.
- (2) *Alternative Method for Equities.* An OTC derivatives dealer may choose to use the Alternative Method to calculate market risk for equity instruments, including OTC options. An OTC derivatives dealer may also use this alternative method if the Commission does not approve the OTC derivatives dealer's use of VAR models for equity instruments. Under the alternative method, the deduction for market risk will be an amount equal to the largest theoretical loss calculated in accordance with the theoretical pricing model set forth in Appendix A of § 240.15c3-1. The OTC derivatives dealer may use its own theoretical pricing model as long as it contains the minimum pricing factors set forth in Appendix A.
- (3) *Non-Marketable Securities.* An OTC derivatives dealer may not use a VAR model to determine a capital charge for any category of securities having no ready market or any category of debt securities which are below investment grade, or any derivative instrument based on the value of these categories of securities, unless the Commission has granted, pursuant to paragraph (a)(1) of Appendix F, for an alternative treatment for any such category of securities, rather than calculate the market risk capital charge for category of securities under paragraphs (c)(2)(vi) and (vii) of §240.15c3-1.
- (4) *Residual Positions.* To the extent that a position has not been included in the calculation of the market risk charge in subparagraphs (1) through (3) of this paragraph, the market risk charge for the position shall be computed under paragraph (c)(2)(vi) of § 240.15c3-1.

Credit risk exposure

The capital requirement for credit risk arising from an OTC derivatives dealer's eligible OTC derivatives transactions consists of a counter-party charge and a concentration charge. The counter-party charge is computed as follows:

- (1) The net replacement value for each counter-party (including the effect of legally enforceable netting agreements and the application of liquid collateral) multiplied by 8% multiplied by the counter-party factor. The counter-party factors are 20% of entities with ratings for senior unsecured long term debt or commercial paper in the two highest rating categories by a nationally recognized statistical rating organization ("NRSRO"); 50% for entities with ratings for senior unsecured long term debt in the third and fourth highest ratings categories by an NRSRO; and 100% for entities with ratings for senior unsecured long term debt below the four highest rating categories.

- (2) The net replacement of value for each counter-party (including the effect for legally enforceable netting agreements and the application of liquid collateral) that is insolvent, or in bankruptcy, or that has senior unsecured long-term debt in default.

The concentration charge is computed as follows: where the net replacement value in the account of any one counter-party exceeds 25% of the OTC derivatives dealer's tentative net capital, deduct the following amounts:

- (1) For counter-parties with ratings for senior unsecured long-term debt or commercial paper in the two highest rating categories by an NRSRO, 5% of the amount of the net replacement value in excess of 25% of the OTC derivatives dealer's tentative net capital;
- (2) For counter-parties with ratings for senior unsecured long-term debt in the third and fourth highest rating categories by an NRSRO, 20% of the amount of the net replacement value in excess of 25% of the OTC derivatives dealer's tentative net capital;
- (3) For counter-parties with ratings for senior unsecured long-term debt below the four highest rating categories, 50% of the amount of the net replacement value in excess of 25% of the OTC derivatives dealer's tentative net capital;

Aggregate Securities and OTC Derivatives Positions

Provide information for each affiliated broker-dealer as of the end of each quarter indicating the name of each affiliated broker-dealer in a separate column, or complete a separate schedule for each affiliated broker-dealer. In the event of a separate listing of a position, financial instrument or other wise is required pursuant to any of the provisions of Section 240.17h-1T, the dealer should indicate as such in the appropriate section of this schedule. Where appropriate, indicate long and short positions separately.

Paper work Reduction Act Disclosure

Part IIB of Form X-15A-5 requires an OTC derivatives dealer to file with the Commission certain financial and operational information. The form is designed to enable the Commission to ascertain the nature and scope of a dealer's over-the-counter derivatives activity and to monitor the dealer's financial condition and risk exposure.

It is estimated that an OTC derivatives dealer will spend approximately 20 hours completing Part IIB of Form X-17A-5. Any member of the public may direct, to the Commission, any comments concerning the accuracy of this burden estimate and any suggestions for reducing this burden.

The information collected pursuant to Part IIB of Form X-17A-5 will be kept confidential.

This collection of information has been reviewed by the Office of Management and Budget (OMB) in accordance with the clearance requirements of 44 U.S.C. §3507. This collection of information has been assigned Control Number 3235-0498 by OMB.

An agency may or not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid number. Section 17(a) of the Securities Exchange Act of 1934 authorizes the Commission to collect the information on this Form from registrants. See 15 U.S.C. § 78q.
