OMB Control Number: 0694-0119

Expiration Date: 24 November 2014

DEFENSE INDUSTRIAL BASE ASSESSMENT: Strategic Materials

SCOPE OF ASSESSMENT

The U.S. Department of Commerce, Bureau of Industry and Security (BIS), Office of Technology Evaluation (OTE), in coordination with the Defense Logistics Agency (DLA) is conducting an industrial base survey and assessment of the supply chain associated with six critical and strategic materials required for key defense systems and platforms.

The primary goal of this assessment is to assist the defense community in understanding the health and competitiveness of critical material suppliers, and identify specific issues and problems facing the industry. Over the longer term, agencies will be better informed to develop targeted planning and acquisition strategies to ensure the availability of the materials supply chain to support critical defense missions and programs.

RESPONSE TO THIS SURVEY IS REQUIRED BY LAW

A response to this survey is required by law (50 U.S.C. app. Sec. 2155). Failure to respond can result in a maximum fine of \$10,000, imprisonment of up to one year, or both. Information furnished herewith is deemed confidential and will not be published or disclosed except in accordance with Section 705 of the Defense Production Act of 1950, as amended (50 U.S.C App. Sec. 2155). Section 705 prohibits the publication or disclosure of this information unless the President determines that its withholding is contrary to the national defense. Information will not be shared with any non-government entity, other than in aggregate form. The information will be protected pursuant to the appropriate exemptions from disclosure under the Freedom of Information Act (FOIA), should it be the subject of a FOIA request.

Not withstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

BURDEN ESTIMATE AND REQUEST FOR COMMENT

Public reporting burden for this collection of information is estimated to average 14 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information to BIS Information Collection Officer, Room 6883, Bureau of Industry and Security, U.S. Department of Commerce, Washington, D.C. 20230, and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control No. 0694-0119), Washington, D.C. 20503.

ricv	Section I: GENERAL INSTRUCTIONS
	Section 1. General Instructions
A.	Your organization is required to complete this survey using an Excel template, which can be downloaded from the U.S. Department of Commerce, Bureau of Industry and Security (BIS) website: www.bis.doc.gov/TBD . At your request, survey support staff will e-mail the Excel survey template directly to your organization. For your convenience, a PDF version of the survey is available on the BIS website to aid internal data collection. DO NOT submit the PDF version of your organization's response to BIS.
В.	Respond to every question. Surveys that are not fully completed will be returned for completion. Use comment boxes to provide any information to supplement responses provided in the survey form. Make sure to record a complete answer in the cell provided, even if the cell does not appear to expand to fit all the information. DO NOT COPY AND PASTE RESPONSES WITHIN THIS SURVEY. Survey inputs should be made manually, by typing in responses or by use of a dropdown menu. The use of copy and paste can corrupt the survey template. If your survey response is corrupted as a result of copy and paste responses, a new survey will be sent to you for immediate completion.
C.	Do not disclose any classified information in this survey form.
D.	If information is not available from your organization's records in the form requested, you may furnish estimates.
E.	In some questions on this survey, definitions of terms are included in comment boxes. These are noted by the small red triangle in the upper-right corner of a relevant box. To see the definition, move your mouse over the box with the red triangle.
F.	Questions related to this survey should be directed to BIS staff: Matthew Sigmund, Trade and Industry Analyst, 202-482-0634, matthew.sigmund@bis.doc.gov LaTiesha Cooper, Trade and Industry Analyst, 202-482-5415, latiesha.cooper@bis.doc.gov Emily Ensley, Trade and Industry Analyst, 202-482-3256, emily.ensley@bis.doc.gov Email is the preferred method of contact.
G.	Upon completion, review, and certification of this Excel survey, transmit the survey via e-mail attachment to: TBD. Be sure to retain a copy for your records.
Н.	For questions related to the overall scope of this Industrial Base assessment, contact: Brad Botwin, Director, Industrial Studies Office of Technology Evaluation, Room 1093 U.S. Department of Commerce, BIS 1401 Constitution Avenue, NW Washington, DC 20230

Term	Section II: Definitions Definition
Alloy	A metal made by combining two or more metallic elements to give, for example, greater strength or resistance to corrosion.
Applied Research	Systematic study to gain knowledge or understanding necessary to determine the means by which a recognized and specific need may be met. This activity includes work leading to the production of useful materials, devices and systems or methods, including design, development, and improvement of prototypes and new processes.
Authorizing Official	Executive officer of the organization or business unit or other individual who has the authority to execute this survey on behalf of the organization.
Basic Research	Systematic, scientific study directed toward greater knowledge or understanding of the fundamental aspects of phenomena and of observable facts.
Capacity Utilization Rate	The percent of an organization's potential output that is actually being used in current production, given the current number of shifts in operation.
Commercial and Government Entity (CAGE) Code	Commercial and Government Entity (CAGE) Code identifies companies doing or wishing to do business with the U.S. Federal Government. The code is used to support mechanized government systems and provides a standardized method of identifying a given facility at a specific location. Find CAGE codes at: http://www.logisticsinformationservice.dla.mil/BINCS/begin_search.aspx
Component	Any raw material, substance, piece, part, software, firmware, labeling, or assembly which is intended to be included as part of the finished, packaged, and labeled device.
Customer	An entity to which an organization directly delivers the product or service that the facility produces. A customer may be another company or another facility owned by the same parent organization. The customer may be the end user for the item but often will be an intermediate link in the supply chain, adding additional value before transferring the item to yet another customer.
Data Universal Numbering System (DUNS)	A nine-digit numbering system that uniquely identifies an individual business. Find DUNS numbers at: http://fedgov.dnb.com/webform
Direct Support	Product/service is provided by your organization to the specified customer, not through a third party (for example, prime contractor or distributor).
Distributor	An entity that buys noncompeting products or product lines, warehouses them, and resells them to retailers or directly to the end users or customers.
Finished Product	Any product, or accessory to any product, that is suitable for use or capable of functioning, whether or not it is packaged or labeled.
Full Time Equivalent (FTE) Employees	Employees who work for 40 hours in a normal work week. Convert part-time employees into "full-time equivalents" by taking their work hours as a fraction of 40 hours.
Indirect Support	Product/service is provided to the specified customer through a third party (for example, prime contractor or distributor).
Manufacturer	An organization that uses labor and capital to convert raw materials into finished or semifinished goods. For the purpose of this survey, manufacturing includes integration and assembly.
Manufacturing Material	Any material or substance used in or used to facilitate the manufacturing process, a concomitant constituent, or a byproduct constituent produced during the manufacturing process, which is present in or on the finished device/product.
North American Industry Classification System (NAICS) Code	North American Industry Classification System (NAICS) codes identify the category of product(s) or service(s) provided by your organization. Find NAICS codes at: http://www.census.gov/epcd/www/naics.html
Precious Metals	Metals that have high economic value due to their rarity. Most commonly gold, silver, platinum, and palladium.
Product/Process Development	Conceptualization and development of a product prior to the production of the product for customers.
Rare Earth Element	A category that includes element numbers 57-71 of the periodic table (lanthanum, cerium, praseodymium, neodymium, promethium, samarium, europium, gadolinium, terbium, dysprosium, holmium, erbium, thulium, and ytterbium) as well as yttrium (39) and scandium (21).
Service	An intangible product (contrasted to a good, which is a tangible product). Services typically cannot be stored or transported, are instantly perishable, and come into existence at the time they are bought and consumed.
Single Source	An organization that is designated as the only accepted source for the supply of parts, components, materials, or services, even though other sources with equivalent technical know-how and production capability may exist.
Sole Source	A organization that is the only source for the supply of parts, components, materials, or services. No alternative U.S. or non-U.S. based suppliers exist other than the current supplier.
STEM	STEM stands for Science, Technology, Engineering and Mathematics.
Supplier	An entity from which your organization obtains inputs. A supplier may be another firm with which you have a contractual relationship, or it may be another facility owned by the same parent organization. The inputs may be goods or services.
United States	The "United States" or "U.S." includes the 50 states, Puerto Rico, the District of Columbia, the island of Guam, the Trust Territories, and the U.S. Virgin Islands.
Unalloyed Metal	A metal in it's pure form, not combined with any other substance.

		BUSINESS	CONFIDENTIAL - Per Sect	ion 705(d) of the Defense Production Act		

Complete the table below to describe ALL your organization's critical materiab-related capabilities. Capabilities include items sold to external customers in addition to semi-finished items requiring further processing within your organization. For example, if your organization produces titanium sponge that it further processes into titanium ingot and/or bar, each product must be included.

For each unique critical materials-related product you organization produces, provide a PRODUCT NAME. Indicate the TYPE of product, and whether it is an ALLOY or UNALLOYED, Next specify the GABDE/COMPOSITION and provide a brief ADDITIONAL DESCRIPTION with any additional information/unique properties of the product. If you indicated OTHER in the GABDE/COMPOSITION section, specify the makings of the third summ product here. Complete the DNU SEP INCEPTION.

In the PRODUCTION portion, provide your organization's AVERAGE MONTHLY OUTPUT of each product and the MAXIMUM MONTHLY OUTPUT your organization would be capable of producing with three eight-hour shifts operating seven days per week with your current facilities and equipment. Next, indicate if the product is sold OUTSIDE your organization or ultilized for further processing only and specify the PRICENTIAGE SOLD TO EXTERNAL CUSTOMERS.

Last, specify if your organization is a SOLE SOURCE of each product.

NOTES: You must use one row for each unique combination of product TYPE and COMPOSITION. If OTHER is selected, provide a decription in the applicable write-in section.

Don't at Name	7	Product Composition			nd Use		Product

Section 3a: Suppliers for Critical Materials-Related Product Lines

In the table below, identify the EXTERNAL suppliers for your organization's critical materials-related product line(s). Suppliers are considered EXTERNAL if they are not directly part of the organization completing this survey. For each of the products your organization identified in the PRODUCTS section (2a), indicate the suppliers providing key TYPES of inputs. Input TYPES include: Raw Material, Semi-Finished Material, Finished Material, Finish

For each, provide the SUPPLER NAME, the TYPE of input received from the supplier, and an additional DESCRIPTION of the product provided (for example: aluminum bar). Next, select the STATE and COUNTRY where the supplier is located and indicate whether they are a SINGLE or SOLE SOURCE for your organization. In the remaining PRODUCT USE columns, select the critical materials-related product line(s) where the supplied item is utilized (up to five).

 $\textbf{NOTE:} \ A \ supplier \ may \ be \ another \ business \ unit/division/facility \ within \ your \ same \ organization.$
