

**Institutional Review Board Certification****Notice of Renewal – Expedited Review****Principal Investigator/Project Director:** David Rein**Department:** Public Health Research**IRB Protocol Number:** 13.05.12**Project Number:** 7411**Protocol Title:** Formative Research to Assess Injection Behaviors Among Young Persons Who Inject Drugs in Rural and Suburban Settings**Expiration Date:** 12/5/2014

This notification certifies that the research protocol and consent documents described above have been renewed by the NORC Institutional Review Board (IRB00000967), under its Federalwide Assurance #FWA00000142, which is valid through July 10, 2018.

The IRB has approved continuation of your research for a period of one year. To avoid a lapse in IRB approval, please submit your continuing review materials to the IRB **at least 2 weeks** prior to the expiration date listed above. Although the IRB will provide reminders to you about renewing your study's approval as you near the expiration date, **it is the responsibility of the principal investigator and project director to ensure that IRB approval does not lapse and that continuing review materials are submitted before a study's approval expires. If a study's IRB approval lapses, all human subjects research activities must stop until IRB approval is renewed.**

Any amendments or other changes to this protocol must be submitted for review by the IRB, and all adverse events must be reported to the IRB.

This protocol was reviewed and renewed pursuant to Expedited Review Category 8, under which an expedited review procedure may be used for continuing review of research previously approved by the IRB at a convened meeting where no subjects have been enrolled and no additional risks have been identified.

Karen H. Grigorian, IRB Chair
