

INSTRUCTIONS FOR REPORTING ALL-CARGO CARRIER ACTIVITY

1. **Airport Name** is the name of the airport at which the all-cargo activity took place. Code is the location identifier to each airport by the FAA.
2. **Carrier Name** is the name of the carrier which performed the all-cargo revenue landings. Code is the 2-4 alpha numeric code assigned to each carrier for use in this program.
3. **Aircraft Code** is a code developed for use in reporting data for funding cargo. A 3-digit numerical code has been assigned to each aircraft model.
4. **Aircraft Name and Model** is the official name and model of the aircraft.
5. **Number of Revenue Cargo Landings** is the total number of revenue landings by each aircraft model in all-cargo activity.
6. **Aircraft Gross Landed Weight** is the certified maximum gross landed weight (in pounds) of the aircraft type as specified by the aircraft manufacturer without regard to its cargo carrying capacity, fuel supply, and/or actual payload.
7. **A Signature** and date is required by the **Airport Representative** who is duly authorized to certify and attest to the validity and accuracy of the reported information.

Exclusions:

1. Aircraft that are engaged in transportation of both revenue passengers and cargo are excluded from the all-cargo category.
2. Aircraft that have permanently installed passenger facilities for scheduled and nonscheduled passenger flights are excluded from the all-cargo category.
3. Aircraft that are engaged in non-revenue operations (i.e., training or re-positioning of aircraft).

Contacts:

If there are any questions regarding the completion of this form please contact FAA Headquarters, National Planning Division, telephone number (202) 267-8739.

Completed forms should be sent to the following address:
