Form California Walnut Board (CWB) 4&5 (Inventory Report)

This change of worksheet addresses modifications to one form currently approved under OMB No. 0581-0178, Generic OMB Vegetable and Specialty Crops. The form is used by the California Walnut Board (CWB) to monitor walnut handler's inventory. All changes are merely cosmetic. In the previously approved information collection, the burden provided was an overestimated amount. The information to complete this form remains readily available to the respondents, and the time to complete remains unchanged. As a result, the hours per response for these forms would remain 0.17. Below is a justification for the changes to Form CWB 4&5.

Form CWB 4&5 - Page 1: The content on this page has been changed to include specific language indicating that the information requested is for products that the handler owns. Page one now includes instructions as to how to complete page two. Also, the statement providing space for the due date of all signed originals was moved from under the section providing instructions for page one, to under the section providing instructions for page two.

Form CWB 4&5 - Page 2: The content on this page is structured to allow space for walnut handlers to separately list inventory held for third parties. Information requested on this page includes: how many inshell and shelled pounds, for both certified and uncertified walnuts and the owners contact information.
