

Change the World, Start with ENERGY STAR Home Improvement Profile

Step 1

What's Your Score? Use our [Home Energy Yardstick](#) to compare your home's energy use to others across the country. Is higher or lower than average? If your score is low, set a goal to increase efficiency. Even if your home scores well, there are always opportunities to increase performance!

Step 2

Get Recommendations. Our online [Home Advisor](#) will quickly give you recommendations to improve your home's energy efficiency. You can also contact a professional energy consultant to give you more customized recommendations and guide you through the improvement process. They can use specialized software to estimate what improvements will help you reach your goal.

Step 3

Take the Pledge. "Change the World, Start with ENERGY STAR" is a national campaign that encourages all Americans to take steps to help fight global warming by using less energy at home, at work, and in their communities. Through the [ENERGY STAR Pledge](#), you can commit to taking specific actions to improve energy efficiency.

Step 4

Track Your Progress. Twelve months after you make the improvements, come back to the [Home Energy Yardstick](#) and see how much your score gone up. Complete the 'Home Improvement Profile' to show the changes you've made and the results you've achieved. If you wish, send us the completed Profile – and your project might be featured on the ENERGY STAR Web site!
