

## BANANAS: 2011 Value of Sales Up 6 Percent

Fresh market banana utilization in 2011 for the State of Hawaii totaled 17.4 million pounds, a decrease of 2 percent or 0.4 million pounds from 2010. Indications from the Hawaii fresh fruit survey also reveal a 7 percent decrease in statewide banana acreage from 1,400 acres in 2010, to 1,300 acres in 2011. Weather conditions during the 2011 growing season varied by location, however, many areas experienced a lack of water due to drought conditions and irrigation was necessary to maintain the crop. Many farmers reported ongoing issues with the Banana Bunchy Top Virus (BBTV). Despite hardships caused by drought and disease, banana yield increased 7 percent to 17,400 pounds per acre, up from 16,200 pounds per acre in 2010.

Based on these data collected, producers received an average price of 65.0 cents per pound for fresh banana

**BANANAS: Acres Harvested and Utilization, State of Hawaii, 2002 - 2011**

in 2011, 8 percent (5.0 cents) more than in 2010. If this preliminary price holds, it will be a new state record high, surpassing 60.0 cents per pound set in 2010. Total value of the banana crop, based on production and price, totaled \$11.3 million, 6 percent greater than the \$10.7 million received in 2010. ■
