State of Preschool 2013 Questionnaire

2013 State Yearbook Survey Login

Welcome to the 2013 State of Preschool Yearbook Survey. Thank you very much for your continued help with NIEER's reports on state-funded preschool programs. We are gathering information for "The State of Preschool 2013: State Preschool Yearbook", which will focus on the 2012-2013 program year.

If you have any questions while you are working on the web survey, please contact Megan Carolan at (848) 932-3137 (mcarolan@nieer.org), Jen Fitzgerald (848) 932-3138, (jfitzgerald@nieer.org) or Jim Squires (802) 425-2608 (jsquires@nieer.org). Questions about content can also be directed to Chris Chapman at (202) 502-7414 (chris.chapman@ed.gov).

Please complete the survey and submit your responses no later than **Monday August 19th**. After you submit your responses, we will be in touch to confirm that we have correctly interpreted the data from your state.

We ask that you keep the definitions below in mind as you complete the survey:

State of Preschool: The *Yearbook* focuses on state-funded preschool initiatives meeting these criteria below.

- The initiative is funded, controlled, and directed by the state.
- The initiative serves children of prekindergarten age, usually 3 and/or 4. Although initiatives in some states serve broader age ranges, programs that serve only infants and toddlers are excluded.
- Early childhood education is the primary focus of the initiative. This does not exclude programs that offer parent education, but does exclude programs whose *main focus* is on parent education. Programs that focus on parent work status or programs where child eligibility is tied to work status are also excluded.
- The initiative offers a group learning experience to children at least two days per week.
- State-funded preschool education initiatives must be distinct from the state's system for subsidized child care. However, preschool initiatives may be coordinated and integrated with the subsidy system for child care.
- The initiative is not primarily designed to serve children with disabilities, but may include children with disabilities.
- State supplements to the federal Head Start program are considered to constitute de facto state preschool programs if they substantially expand the number of children served, and the state assumes some administrative responsibility for the programs. State supplements to fund quality improvements, extended days, or other program enhancements and that expand enrollment minimally are not considered equivalent to a state preschool program.

3-year-old/4-year-old/5-year-old: For this survey, children considered to be 3 years old during the 2012-2013 school year are those eligible for entry into kindergarten two years later, during the 2014-2015 school year. Children considered to be 4 years old during the 2012-2013 school year are those eligible for entry into kindergarten one year later, during the 2013-2014 school year. Children considered to be 5 years old during the 2012-2013 school year are 5-year-olds who were already eligible for kindergarten at the beginning of the 2012-2013 program year.

We greatly appreciate your help and thank you for your participation.

Responses to questions 5-9 and 10b require finalized, **unduplicated** enrollment counts for the 2012-2013 program year.
