## Safer Campuses and Communities Questionnaire

The following questions are meant to ask your perceptions regarding alcohol use among students of [college/university], and what current approaches are being taken to reduce the harm related to their drinking. We are particularly interested in whether you are familiar with the Safer Campuses and Communities Project and whether it would be useful in those efforts.

As stated in the email invitation, the questionnaire does not include any questions about your own behavior, but does ask about your perception of student drinking problems and how to respond to them. Your participation is entirely voluntary, and you can refuse to answer any individual question and are free at any time to discontinue the survey by simply closing your browser.

Thank you for your interest in this important topic.

Public reporting burden of this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Reports Clearance Officer; 1600 Clifton Road NE, MS D-74, Atlanta, Georgia 30333; ATTN: PRA (0920-XXXX)

[IF "No" or "Not Sure" To Previous Recall Question]

The Safer Campuses and Communities Intervention is aimed at reducing intoxication at off-campus parties in private homes and apartments (including fraternities and sororities) via a combination of alcohol control measures, including enforcement of drunk driving laws, laws against selling or serving alcohol to minors, and local ordinances to address nuisance parties (e.g., loud or with obviously intoxicated guests). A large part of the intervention is the use of various media and messages so students will be aware of the enforcement operations.
