Public Reporting Burden Statement

Public reporting burden of this collection of information is estimated to average 4 hours each for the interim and end of year reports, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to CDC/ATSDR Information Collection Review Office, 1600 Clifton Road NE, MS D-74, Atlanta, Georgia; ATTN: PRA 0920-NEW.

Overview

The Air Pollution and Respiratory Health Branch (APRHB) of the National Center for Environmental Health (NCEH), leads Centers for Disease Control and Prevention's (CDC) fight against environmental-related respiratory illnesses, including asthma, and studies indoor and outdoor air pollution. APRHB seeks to implement a management information system (MIS). The MIS will be known as the "Asthma Information Reporting System" (AIRS) and will be intended to allow APRHB's grantees to document information relevant to their programs including resources, work plan and indicators.

Purpose

The purpose of this document is to define the data requirements for AIRS.
