

Why are Occupational Injury and Illness Data Important?

Your data are important for making the American workplace safer. Data you report are aggregated with data from other establishments and used to identify injury and illness patterns among industries and occupations.

Incidence rate and number of nonfatal occupational injuries and illnesses by private industry sector, 2008

Source: Bureau of Labor Statistics, U.S. Department of Labor, October 2009

Want to explore the data?

- Compute your own injury and illness incidence rate to assist with safety management and to compare with your industry at <http://data.bls.gov/IIRC/>.
- Access data on industry, demographic characteristics, and case characteristics through the “Profiles on the Web” tool at <http://data.bls.gov/GQT/servlet/InitialPage>.
- Get the latest occupational injury and illness statistics at <http://www.bls.gov/iif/home.htm>.
