## **Collections of Information Employing Statistical Methods**

### **1. Respondent Universe and Sampling Methods**

No statistical data collection or analysis is done, due to the qualitative nature of this type of research. It is not quantifiable, and includes small sample sizes for each individual round of research.

Respondents are recruited through the research facility retained to conduct the research. Recruiters use a combination of contact lists and mall intercept screening to obtain parent and youth respondents. Exact quantity, gender, age, and race/ethnicity balance is contingent upon nature of the research. Attachments 1 and 2 contain the details of how respondents are recruited.

### **2. Contact Information for Data Collection and Analysis**

For information about data examination, contact Andrew Hertzberg (202-395-6353).
