**General Instructions for the Reporting of the
Capital Assessments and Stress Testing information collection
(FR Y-14Q/M)**

This Report is required by law: section 165 of the Dodd-Frank Act (12 U.S.C. § 5365) and section 5 of the Bank Holding Company Act (12 U.S.C. § 1844). Public reporting burden for quarterly schedules in this information collection is estimated to vary from 8 to 1,720 hours per response, with certain schedules only reported by respondents that meet certain materiality thresholds. Public reporting burden for monthly information collection is estimated to 430 hours per response. These estimates include time to gather and maintain data in the required form and to review instructions and complete the information collection. Comments regarding this burden estimate or any other aspect of this information collection, including suggestions for reducing the burden, may be sent to Secretary, Board of Governors of the Federal Reserve System, 20th and C Streets, NW, Washington, DC 20551, and to the Office of Management and Budget, Paperwork Reduction Project (7100-0341), Washington, DC 20503.

General Instructions for Preparation of the Quarterly Capital Assessments and Stress Testing Reports FR Y-14Q/M

The FR Y-14Q/M reports collect detailed data on bank holding companies' various asset classes and categories of pre-provision net revenue (PPNR) on a quarterly/monthly basis, which will be used to support supervisory stress testing models and for continuous monitoring efforts. The FR Y-14Q/M reports includes data schedules for Securities Risk; Retail Risk; PPNR; Wholesale Risk; Trading, Private Equity, and Other Fair Value Assets (Trading); Basel III and Dodd-Frank (Basel III); and Regulatory Capital Instruments. All of the data schedules, other than the Basel III schedule and Regulatory Capital Instruments schedules are to be submitted each reporting period. The Basel III and Regulatory Capital Instruments data schedules are to be submitted for all quarters, except for the third quarter.

(1) Who Must Report

(i) Reporting Criteria

- a. Large BHCs that meet an annual threshold of \$50 billion or more in total consolidated assets, as defined by the capital plan rule (12 CFR 225.8), are required to submit the Capital Assessment and Stress Testing report to the Federal Reserve. The capital plan rule defines total consolidated assets as the average of the company's total consolidated assets over the course of the previous four calendar quarters, as reflected on the BHC's consolidated financial statement for bank holding companies (FR Y-9C). The calculation shall be effective as of the due date of the bank holding company's most recent FR Y-9C.
- b. The specific reporting requirements for each bank holding company depend upon the size of the holding company and the level of activity in certain risk types. The number of schedules each bank holding company is required to complete is subject to materiality threshold.
 - 1) **PPNR schedule, Basel III schedule, and Regulatory Capital Instruments schedule:** All bank holding companies must submit these schedules.
 - 2) **Trading schedule:** Only BHCs with greater than \$500 billion in total consolidated assets who are subject to the amended market risk rule (12 CFR Parts 208, Appendix, E and 225, Appendix E) must submit this schedule and worksheets.
 - 3) **All other quarterly and monthly schedules:** The remaining schedules are subject to materiality thresholds. Material portfolios are defined as those with asset balances greater than \$5 billion or asset balances greater than 5 percent of Tier 1 capital on average for the four quarters preceding the reporting quarter. For schedules that require the institutions to report information on serviced

loans, the materiality threshold is based on the asset balances associated with the BHC's owned portfolio. All data used to determine materiality should be measured as of the close of business of the last calendar day of the quarter, and assets included in a given portfolio are defined in the instructions for each schedule. BHCs will have an option to complete the data schedules for immaterial portfolios. If the BHCs do not complete the schedules, the Federal Reserve will assign losses to immaterial portfolios in a manner consistent with the given scenario to produce supervisory estimates.

- c. New reporters must submit the FR Y-14Q PPNR new reporters template with data starting as-of 2009 on the first quarter that they are subject to reporting. New reporters must also submit historical data, starting in January 2007, for the FR Y-14Q retail schedules.

(ii) Exemptions

- a. Only bank holding companies that did not meet the reporting criteria listed in paragraph one above are exempt from reporting.

(2) Where to Submit the Reports

- (i) **All bank holding companies** subject to these reporting requirements must submit their completed reports electronically. Bank holding companies will be provided information on how to transmit data directly to the Federal Reserve or to the Federal Reserve through data aggregators.

(3) When to Submit the Reports

- (i) Bank holding companies must file the *Capital Assessment and Stress Testing schedules* (FR Y-14Q/M) on the appropriate time schedules as described below:
 - a. Bank holding companies must submit data associated with quarterly data schedules on the same time schedule as the FR Y-9C reported data (40 calendar days after the calendar quarter-end for March, June, and September and 45 calendar days after the calendar quarter-end for December, unless that day falls on a weekend or holiday (subject to timely filing provisions)).
 - b. Bank holding companies must submit data associated with the monthly data schedules by the 30th calendar day after the last business day of the preceding calendar month.
 - c. Beginning in 2012, the quarterly Trading schedule as-of-date for the first, second, and fourth quarters would be the same as the as-of dates for the other reported schedules. For the 3rd quarter, the BHCs will be required to report data as part of a market shock exercise.¹ Due to the nature of this exercise, the Federal Reserve will

¹ See, for example, 18 U.S.C. 1005

- communicate to the appropriate bank holding companies the specific as-of date for trading data in the fourth quarter, but no later than December 1st. The data would be due 40 calendar days after the notification date (notifying respondents of the as-of-date) or, for the 3rd quarter data, December 15th, whichever comes earlier. BHCs may provide these data as-of the most recent date that corresponds to their weekly internal risk reporting cycle as long as it falls before the as-of-date. In addition, for BHCs that are required to re-submit a capital plan, the due date for the quarter preceding the quarter in which the BHCs are required to re-submit a capital plan would be the later of (1) the normal due date or (2) the date that the re-submitted capital plan is due, including any extensions.
- d. **General Timing:** If the submission date falls on a weekend or holiday, the data must be received on the first business day after the weekend or holiday. No other extensions of time for submitting reports will be granted. The data are due by the end of the reporting day on the submission date. Earlier submission aids the Federal Reserve in reviewing and processing the data and is encouraged.
- (ii) **New reporters:** For the Y-14Q schedules, the filing deadline will be extended to (1) 90 days after the quarter-end for the first two quarterly submissions and (2) 65 days after the quarter-end for the third and fourth quarterly submissions. Beginning with the fifth quarterly submission, these respondents will be required to adhere to the standard reporting deadlines above. For the Y-14M schedules, the initial deadline will be 90 days after the end of the reporting month, at which time data for all three intervening months would be due. For example, a new respondent for the September 30 reporting period will be expected to submit data corresponding to the September 30, October 31, and November 30 reporting periods by December 31.

(4) How to Prepare the Reports

(i) Applicability of GAAP, Consolidation Rules, and Other Instructional Guidance

- a. Bank holding companies are required to prepare and file the FR Y-14Q/M schedules in accordance with generally accepted accounting principles (GAAP) and these instructions. The financial records of the bank holding companies should be maintained in such a manner and scope so as to ensure the FR Y-14Q/M can be prepared and filed in accordance with these instructions and reflect a fair presentation of bank holding companies' financial condition and assessment of their performance under stressed scenarios.

- b. **Rules of Consolidation:** Please see the FR Y-9C General Instructions for a discussion of the rules of consolidation.
- c. Bank holding companies should look to the following published documents (in the order listed below) when determining the precise definition to be used in completing the schedules:
 - The FR Y-14Q/M instructions.
 - The latest available FR Y-9C instructions published on the Federal Reserve’s public web site: <http://www.federalreserve.gov/reportforms>.

(ii) Confidentiality. As these data will be collected as part of the supervisory process, they are subject to confidential treatment under exemption 8 of the Freedom of Information Act. 5 U.S.C. 552(b)(8). In addition, commercial and financial information contained in these information collections may be exempt from disclosure under Exemption 4. 5 U.S.C. 552(b)(4). Disclosure determinations would be made on a case-by-case basis.

(iii) Amended Reports

- a. The Federal Reserve will require the filing of amended reports if reports as previously submitted contain significant errors. In addition, a reporting institution must file an amended report when it or the Federal Reserve discovers significant errors or omissions subsequent to submission of a report. Failure to file amended reports on a timely basis may subject the institution to supervisory action.

(iv) Legal Considerations for International Exposures

- a. A BHC is not required to report a particular data item if a foreign law prohibits the BHC from providing the information to the Federal Reserve. However, the Federal Reserve is authorized by law to collect information from a BHC regarding its exposures, including foreign exposures.³ A BHC must include with its data submission a legal analysis of the foreign law that prohibits reporting the data to the Federal Reserve.
 - The legal analysis must include, but is not limited to, a detailed description and analysis of the law(s) prohibiting the reporting of the information to the Federal Reserve, a summary description of the exposures omitted, any other information the BHC deems relevant to justify omitting the data from the report, and any additional information required by the Federal Reserve.

(v) Questions and requests for interpretations. Bank holding companies should submit any questions or requests for interpretations by email to info@CCAR.frb.org.

FR Y-14M: Domestic First Lien Closed-end 1-4 Family Residential Loan Data Dictionary

Loan Population

- The active loan population includes all loans directly held on the BHC's portfolio and all loans serviced by the BHC in that period.
 - Portfolio loans are defined as all loans meeting the definition of FR Y-9C, Schedule HC-C, item 1.c.(2)(a) (first lien closed-end loans secured by 1-4 family residential real estate).
 - Serviced loans include those meeting the definition of loans reported in FR Y-9C, Schedule HC-S, Item 1.(column A), Schedule HC-S Item M.2.a, Schedule HC-S, Item M.2.b, and all first lien loans meeting the definition of loans reported in Schedule HC-S, Item M.2.d.
 - Also include all loans meeting the definition of trading assets reported on FR Y-9C, Schedule HC-D
- In addition to loans that are currently active during the reporting period, the following loans should also be included:
 - All inventory that has been transferred to another servicer, but only if transferred during the reporting month.
 - All inventory that was liquidated, but only if liquidated during the reporting month.
- Starting with the March 2013 data submission, BHCs are required to continue reporting data on loans which become Real Estate Owned (REO). If a loan is submitted under the Y14M First Lien data schedule through a certain period and becomes an REO, then this loan will be reported through the time the loan terminates as a REO sale or otherwise. BHCs are required to report all REO loans – either serviced by them or sub-serviced by other institutions on their behalf. Report all loans that are reported under Y-9C, Schedule HC-M Item 6.b.(3).
 - Please note that BHCs will continue to report data on the loans which become REO loans using a consistent loan number throughout the history of the loan. Please ensure that the loan number, once assigned to a loan, is not changed as a result of sub servicing or any related aspects.
- We require that a loan number uniquely identify a loan through its entire life. If a BHC is also submitting data to the OCC as part of the OCC Mortgage Metrics Data or OCC Home Equity Data, it is required that the BHC use the same loan number for the FR Y-14M data schedules for all loans that are being reported for the first time in the current reporting period. In the case that a BHC has been submitting different loan numbers for the same loan in the FR Y-14M collection versus OCC data collection, the BHC should continue reporting using the same loan numbers as they have been submitting for the Y-14M submissions. There may be instances where the FR Y-14M data population includes additional loans which are not part of the OCC data sample, and for such loans a unique loan number should be reported. Overall, the data file sent by a BHC should have unique loan numbers across the entire submission.

Additional Formatting

- The collection includes both loan level and portfolio level variables.

- The institutions should provide the loan level data each month in a single text file. This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per active loan in the contributor’s inventory.
- Institutions should provide a separate text file for the portfolio level variables. This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per portfolio segment. Portfolio segments are defined as:
 1. **Serviced** – All serviced loans
 2. **Portfolio HFI Purchased Impaired** – All portfolio loans held for investment and accounted for in accordance with ASC subtopic 310-30; loans and debt securities acquired with deteriorated credit quality (formerly AICPA statement of position 03-3, accounting for certain loans or debt securities acquired in a transfer).
 3. **Portfolio HFI FVO / HFS** – All portfolio loans held for investment measured at fair value under a fair value option or held for sale.
 4. **Other Portfolio** – All portfolio loans not measured at fair value and not purchase impaired
- Options for all fields are comprehensive in identifying a valid value for all loans regardless of status. If a mandatory field is unknown or unavailable and the field definition does not indicate ‘Unknown’ as a valid field option, the field should be left NULL and it will be treated as missing data.
- Optional and best efforts fields are noted in the instructions in the table below.
- No quotation marks should be used as text identifiers.
- Please do not provide a header row
- For any field with a format of ‘character’, please provide the code values as listed in the data dictionary. Do not add a leading or trailing zero or any other character to the data unless specified. It is required that the data formats and code values as listed in this document be strictly followed.

Example: For a data item defined as Character (2), if the respondent is to report the value ‘1’, then the respondent should submit only the character ‘1.’ The respondent should not submit ‘01’, ‘<space>1’, ‘1<space>’, or any other combination that includes a second character.

- Inactive inventory that was paid off in one manner or another (servicing transfer, involuntary liquidation or paid-in-full by borrower) before the beginning of the reporting month should not be included. REO loans as described above will now be included in the data. This holds even if the REO loans were transferred to another servicer.
- The tables on the following pages give more information regarding the fields that should be contained in each of the files.

File Naming Convention:

BHCs must use the following naming convention when submitting data files to the data aggregator.

FRY14_FIRSTLIEN_LOANLEVEL_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

FRY14_FIRSTLIEN_PORTFOLIOLEVEL_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

SUBMISSION_NUMBER will be used to track revisions and resubmissions of this schedule. It must be populated as a two-digit number. For example, the first submission for a given period would have a submission number of ‘01.’ If the BHC has to resubmit the same file, then use ‘02’ for the next submission, and so on.

In the case of the First Lien, Home Equity, and Address Matching Schedules, the BHCs should provide the data each month in a single pipe-delimited text file. Fields should be delimited with a vertical bar ('|', ASCII decimal 124, ASCII hexadecimal 7C).

Example:

Institution A has ID_RSSD equal to 999999. For the First Lien Loan level data file submitted for period 201206, the file would be named as FRY14_FIRSTLIEN_LOANLEVEL_999999_201206_01.TXT. Any subsequent revised Home Equity Loan level file submitted by the institution for the same period will be named as FRY14_FIRSTLIEN_LOANLEVEL_999999_201206_02.TXT, and so on.

FR Y-14M: Address Matching Loan Level Data Collection

Data Format

The BHCs shall provide the data each month in a single bar-delimited text file. Fields should be delimited with a vertical bar (|, ASCII decimal 124, ASCII hexadecimal 7C). This will be a “month-end” file produced each month and reported no later than thirty (30) calendar days after the end of the reporting month. This file will contain one record per active loan in the contributor’s inventory.

For every loan reported on the Y-14M First Lien Closed-end 1-4 Family Loan or Home Equity Loan and Home Equity Line of Credit Schedules, the BHCs shall provide the information set forth in this schedule. Recently, these schedules have been expanded to include REO loans, and such loans will also be included in the Address Matching data collection.

Additional Formatting:

- Options for all fields are comprehensive identifying a valid value for all loans regardless of status. If a value is Unknown or Unavailable the field should be left NULL - populated with a sequence of two vertical bars (||, ASCII decimal 124, ASCII hexadecimal 7C) with no intervening spaces or explicit N/A coding.
- No quotation marks should be used as text identifiers.
- Please do not provide a header row

Inactive inventory that was paid off in one manner or another (servicing transfer, involuntary liquidation or paid-in-full by borrower) before the beginning of the reporting month should not be included.

File Naming Convention:

The standard data files which the Federal Reserve will receive from the data aggregator will follow the following file naming conventions. BHCs will use this naming convention to send the data files to the data aggregator.

FRY14_ADDRESSMATCH_<ID_RSSD>_<AS_OF_MON_ID>_<SUBMISSION_NUMBER>.TXT

SUBMISSION_NUMBER will be used to track revisions and resubmissions of this schedule. It must be populated as a two-digit number. For example, the first submission for a given period would have a submission number of ‘01.’ If the BHC has to resubmit the same file, then use ‘02’ for the next submission, and so on.

In the case of the First Lien, Home Equity, and Address Matching Schedules, the BHCs should provide the data each month in a single bar-delimited text file. This is also referred to as a pipe-delimited text file. Fields should be delimited with a vertical bar (|, ASCII decimal 124, ASCII hexadecimal 7C).

Example:

Institution A has ID_RSSD equal to 999999. For the Address Match data file submitted for period 201206, the file would be named as FRY14_ADDRESSMATCH_999999_201206_01.TXT. Any subsequent revised Address Match data file submitted by the institution for the same period will be named as FRY14_ADDRESSMATCH_999999_201206_02.TXT, and so on.
