WAIST CIRCUMFERENCE WILL BE TAKEN AT THE UMBILICUS. IT MAY BE DONE OVER LIGHT CLOTHING. IF THE RESPONDENT IS WEARING HEAVY CLOTHING (E.G. A BULKY SWEATER), YOU MAY ASK IF THEY COULD CHANGE INTO A LIGHTER WEIGHT TOP.

- ASK THE RESPONDENT TO POINT TO THEIR UMBILICUS (BELLY BUTTON) THROUGH THEIR SHIRT. DEMONSTRATE ON YOURSELF.
- HAVE THE SAMPLE MEMBER STAND RELAXED, BREATHING NORMALLY WITH WEIGHT EVENLY DISTRIBUTED. THE SAMPLE MEMBER SHOULD NOT HOLD HIS/HER BREATH OR ATTEMPT TO “SUCK IN” THEIR STOMACH.
- HAND THE MEASURING TAPE TO THE RESPONDENT AND ASK HIM/HER TO WRAP IT AROUND THEIR WAIST
- WALK AROUND THE RESPONDENT TO MAKE SURE THAT THE TAPE IS:
  - o OVER THEIR UMBILICUS,

## **Adult Biometric Measures – Spanish**

- o SNUG AROUND THE WAIST BUT NOT TIGHT ENOUGH TO COMPRESS THE SOFT TISSUE,
  - o PARALLEL TO THE FLOOR,
  - o NOT TWISTED ANYWHERE
- TAKE THE MEASUREMENT AT THE END OF THE RESPONDENT'S NORMAL EXHALATION. TAKE A READING WHERE THE TAPE CROSSES ITSELF. THE READING SHOULD BE IN CM AND MEASURED TO THE NEAREST .1 CM.

Blood\_Pressure. MEDICIÓN DE LA PRESIÓN ARTERIAL:

Para esta parte de la encuesta, voy a tomar su presión arterial con este aparato. El aparato va a medir la presión arterial 3 veces después de un descanso de 5 minutos. Durante el descanso, le pido que trate de relajarse completamente y que no hable, ni se mueva mucho ya que eso puede afectar la medida de presión arterial. Por favor, mantenga sus pies sobre el suelo durante este periodo de tiempo. Sería conveniente que apague su celular durante este periodo de tiempo ya que es necesario que no hable durante la medición.

NOTE TO INTERVIEWER: BLOOD PRESSURE CUFF MUST BE PLACED ON BARE SKIN.

Una vez que comienzan las mediciones, habrá un descanso de 1 minuto entre cada una de las 3 mediciones. Cuando el aparato infla el brazalete, pudiera sentir que le aprieta y un poco de presión o un poco de hormigueo en los dedos. Esto es normal y desaparece en poco tiempo. Mientras el aparato mide la presión arterial, necesito que no hable ni se mueva, y yo tampoco voy a hablar. Hablar o moverse puede cambiar su presión arterial.

Le daré los resultados al final del examen físico.

¿Tiene alguna pregunta antes de comenzar? Le recuerdo, que después esto, le pediré que no hable y yo tampoco voy a hablar.

3. PLACE THE CUFF SUCH THAT THE LOWER EDGE LIES ABOUT 2 FINGERBREADTHS ABOVE THE CREASE ON THE INSIDE OF THE ELBOW.
4. TIGHTEN THE CUFF AND AFFIX THE VELCRO.
5. YOU SHOULD BE ABLE TO SLIP 1-2 FINGERS BETWEEN THE CUFF AND THE RESPONDENT'S ARM

Tenemos otra parte del estudio diseñada para medir los niveles de actividad. Nos gustaría que usted utilice un medidor de actividad alrededor de su cintura durante los siguientes 7 días. También vamos a dejar un diario para que usted lo complete y nos dé información sobre cosas como cuándo se pone el monitor y cuando se lo quita.

Si está de acuerdo en participar, va a recibir una tarjeta de regalo de \$20 dólares una vez que haya enviado el monitor de regreso a RTI y los datos estén completos. Cuando veamos los datos que nos proporcione, si vemos que no tenemos por lo menos 5 días de datos completos, se le entregará una tarjeta de regalo de \$10 y le pediremos que vuelva a utilizar el monitor de actividad otros 7 días. Usted se puede negar a volver a utilizar el monitor de actividad si lo desea. Si utiliza el monitor de actividad otros 7 días recibirá otra tarjeta de regalo de \$10. Se le pedirá que utilice el monitor de actividad una tercera semana si sus datos están incompletos.
